

Blackboard Learn December 2017 Release Notes - v5.0.63

Last Modified on 04/23/2020 11:49 am IDT

Version: 5.0.63 and 5.1.0.63 (SaaS)

Date Released: December 20, 2017

Supported Blackboard Learn versions: Q4 2016, Q2 2017, Q4 2017, SaaS

KAF version: 5.67.17

Overview

These release notes pertain to the Kaltura Video Building Block 5 for Blackboard Learn 9.x, released December 20, 2017, build 5.0.63, minimum KAF version 5.67.17, supporting the Blackboard self-hosted and managed-hosting.

The Kaltura Video Building Block supports the following service packs:

- Blackboard Learn self-hosted and managed-hosting (v5.0.63) - Q4 2016 release, Q2 2017 release, and release Q4 2017.
- Blackboard Learn SaaS in the classic Learn experience (v5.1.0.63).

New Features

This version introduces the following items:

- **Support for the new Blackboard Learn Q4 2017**
- **Pop Up & Responsive Player** – The player pop up was removed from all Kaltura Mashup Tool embeds. In the standalone Mashup Tool (using 'Course Content > Build Content > Kaltura Media') the player is also responsive, meaning it will change its size when the browser's dimensions change.[\(1\)](#)

Since this change will only affect newly embedded content, we recommend re-embedding any content you want to move to an in-page player.

- **Grading 'Points Possible'** – This version contains the ability to choose the "points possible" for the IVQ submission through the BB 'Assesments' workflow. When the IVQ is added to a course, you can choose a distribution of points other than 1-100. [\(2\)](#)

Known Issues

Issue	Description
KMS-16124	A video may not display on the Grade Assignment page for Group assignment only.

KMS-16372	BlackBoard Mobile app - Content may not display due to a Cookies session error. This only happens when using 'blackboard.com' domain with your BlackBoard instance.
Issue	Description

Limitations

Issue	Description
KMS-15145	When using the standalone Mashup Tool to add a Kaltura video, users cannot add attachments. This issue is caused due to some deprecated classes on that page. Kaltura is working with BB to find a way to allow this capability using new public BB APIs
