Introduction to KMS GO

The Kaltura MediaSpace Go (KMS GO) Mobile application provides you with an intuitive and enjoyable way to watch, create and interact with media on-the-go.

KMS GO delivers your familiar viewing experience from the Kaltura MediaSpace™ Video Portal, with easy discovery of content, playful inspiration suggestions, sharing, offline viewing, commenting, powerful search tools, and many more exciting features.

KMS GO is a fully native app, and currently supported on iPhones for an ideal experience.

KMS GO is also iPad compatible with a 2x viewing experience.

KMS GO for Android was added to deliver a seamless experience across different devices!...stay tuned as we add more exciting features!

Initial Setup

KMS GO must initially be set up by your **KMS administrator**.
