

Introduction to KMS GO

Last Modified on 07/22/2024 12:45 pm IDT

The Kaltura MediaSpace Go aka KMS GO Mobile application provides you with an intuitive and enjoyable way to watch, create, and interact with media on the go. KMS GO delivers your familiar viewing experience from the Kaltura MediaSpace™ Video Portal, with the easy discovery of content, playful inspiration suggestions, sharing, offline viewing, commenting, powerful search tools, and many more exciting features.

KMS GO is a fully native app and is currently supported on iPhones for an ideal experience.

KMS GO is also iPad compatible with a 2x viewing experience.

KMS GO for Android was added to deliver a seamless experience across different devices!...stay tuned as we add more exciting features!

Initial Setup

KMS GO must initially be set up by your **KMS administrator**.
