

Overview of the Kaltura Video Package for Moodle

Kaltura's Video Package for Moodle offers an out-of-the-box extension that lets you view, record, upload, publish, search, and share videos directly from your Moodle environment. This translates into time and money saved for your organization, improved student engagement, creativity, and learning results, as well as ease of use for students, faculty, and teaching assistants.

Kaltura's Video Package for Moodle makes it easy to add the robust capabilities of Kaltura's open-source online video platform to any Moodle site. The package was developed specifically for Moodle and integrates with other features and modules, such as resources and activities so that users can upload and embed media easily.

Main Features and Tools

Upload and Record

- Easy Video Uploading - Upload any type of media (video, audio, images) using a simple interface.
- Capture Personal Recordings - Easily record yourself or capture your screen to create and publish media
- YouTube - Add YouTube video content and metadata.

Organize and Publish

Publishing is the process of taking private content from My Media and publishing it to a Media Gallery or posting it in an inline text.

- My Media – Upload, manage, assign, and share content (based on permissions) with a private media library for each Moodle user.
- Course Media Gallery – Search or view rich media assigned to a course if you are a member. Media can be added by instructors or students, with an option for student contributions moderation by instructors.

Share

Sharing is the process of giving others the ability to publish your content. This is done by publishing your content to the Shared Repository and then letting people publish the content from the Shared Repository to Media Galleries and inline text.

Shared Repository - Use to share content on your site and publish to the course

workflow.

Users can upload videos and share them with others in Moodle courses through the Shared Repository. Content that is uploaded through My Media or a course Media Galley is not automatically uploaded to the Shared Repository. Student and Faculty can publish to the shared repository through My Media, or through an Entry page. After a user publishes its content to the Shared Repository, it can be viewed by all and published to any course Media Gallery in Moodle.

The Shared Repository is available to users based on their role configuration in KAF. A user can publish to and from the Shared Repository contingent upon their configuration. The administrator can configure the Shared Repository to be accessible only to Faculty (Teachers) to create a cross-site Faculty Repository. For more details, please refer to the [Kaltura Video Package V4 for Moodle Setup Guide](#).

View and Interact

- Join webcasting and live events
- Edit videos, including trimming, clipping, and customizing thumbnails
- Enrich videos with calls-to-action, quizzes, advanced metadata, slides, chapters, and interactive content
- Captions - Upload multi-lingual captions to reach international, multi-lingual, and hearing-impaired audiences while also enabling in-video search within the captions.
- Comments - Boost online conversations and user engagement by allowing users to comment on videos.
- Browse, Search, and Embed - Quickly find and embed videos based on metadata (name, description, tags, categories)
- In-video search - Upload captions and then search for every spoken word. Search results allow skipping directly to the relevant part in the video. In-video search is available within an entry or across multiple entries in My Media and the Course Media Gallery.
- Analytics - Managers can view gallery-level reports for video engagement:
 - Which videos are users watching the most?
 - Which users contribute the most videos?
 - Which users watch the most videos?
- Responsive Design: Automatically adjusts site layout to the screen size and device to provide optimal mobile device support.
