Kaltura Webcasting Version v4.1.351 - 12 Jan 2021

Version: 4.1.351

Date Released: January 12, 2021

Prerequisites

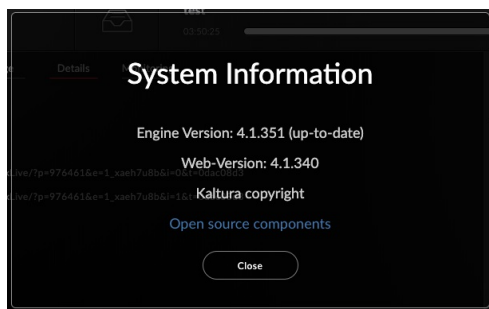

- Webcast Producer Application versions:
 - Engine Version: 4.1.351
 - Web Version: 4.1.351
- Player version: 2.84

What's New

- **Show Hide Timeline Asset** - The ability to toggle the visibility of slides and polls from the Webcasting Producer Application has been added. For more information see [Displaying or Hiding Slides and Polls](https://knowledge.kaltura.com/help/displaying-or-hiding-slides-and-polls) (<https://knowledge.kaltura.com/help/displaying-or-hiding-slides-and-polls>).

- **Show Web Version** - Clicking on the Info icon displays the current web version.

Known Limitations

- The slides that are placed on stage when the Hide/Show Asset button is set to Hide will be shown in the player chapter plugin.
- You cannot remove a slide on a secondary screen when the Hide/Show Asset button is toggled to Off.

Webcasting Analytics Version 11.14.2020 - October 2020

Version: 11.14.2020

Date Released: October 2020

Overview

These release notes pertain to Kaltura Webcasting Analytics, released Oct, 2020

Component	Version
Kaltura Webcasting Analytics	11.14.2020
KMC	6.3.0
Analytics	2.1.0

What's New

- Data is stored and accessible forever, there is no time limitation.
- Aggregate data from both the VOD and the live sessions are consolidated into one dashboard
- The number of registered users for entries that use the registration module
- Ability to view & export Q&A
- Breakdown into 5 levels of live engagement
- View Per User with engagement insights

Known Limitations

- The views under the player timeline breakdown are VOD only.
- Archiving the Webcast will cause the dashboard to dissociate the VOD from the Live and will only show the live entry data.
- Exporting registered users will only be supported from KMS when the dashboard is added there.
- Regional clouds and On-prem are currently not supported.
- In the case that you want to navigate to the Real-Time Dashboard, please use the [Real-Time tab](https://knowledge.kaltura.com/help/real-time-analytics) (<https://knowledge.kaltura.com/help/real-time-analytics>) in the KMC Analytics where you can see all the entries that have broadcasted in the last 7 days.

You can find all the details [here](https://knowledge.kaltura.com/help/webcasting-entry-level-analytics) (<https://knowledge.kaltura.com/help/webcasting-entry-level-analytics>).

Kaltura Webcasting Version v4.1.320/v4.1.325- 21 June 2020

*Please note that the first lines in this template are for the top summary table logic. It will be hidden on the front end.

Version: 4.1.320/4.1.325

Date Released: June 2020

Resolved Issues

ID	Description
WEBC-1986	The issue where no internet error slate was shown when there was internet has been fixed.
WEBC-1979	Self-serve camera no longer stays on connecting status.
WEBC-1995	Slides/polls now display properly on an external screen,

Webcasting Version 5.99.935 - May 2020 Release

KMS Version: 5.99.935

Date Released: May 3, 2020

What's New

- **Outlook Integration** - The Kaltura Webcasting Outlook Add-In has been added to the Webcasting application making it easier to create and launch a webcast without the need of entering into Kaltura MediaSpace. For more information see [Webcasting Outlook Integration](https://knowledge.kaltura.com/help/webcasting-outlook-integration) (<https://knowledge.kaltura.com/help/webcasting-outlook-integration>).

Webcasting Version 4.1.315 - May 2020 Release

Version: 4.1.315

Date Released: May 24, 2020

What's New

- **Load Webcasting Producer application as webview** - You can now load the main functionalities of the Webcasting Producer Application via a webview. This allows you to create a seamless release process of updating the Producer Application via the web instead of having to download the entire application for each release.

Resolved Issues

ID	Description
SUP-21294	Analytics - The issue where Viewers' counts dropped during a live event has been fixed.

Webcasting Version 4.1.310 - March 2020 Release

Version: 4.1.310

Date Released: March 2020

What's New

- **Auto Archive** - Archiving events enables the producer to store all current event content, including VOD and slides, to a separate entry, and clear the live entry to be reused. The Auto Archive feature may be enabled when [Creating a Webcasting Event](https://knowledge.kaltura.com/help/creating-a-webcasting-event#event_recording) (https://knowledge.kaltura.com/help/creating-a-webcasting-event#event_recording). For more information see [Managing VOD Creation for Webcasting Events](https://knowledge.kaltura.com/help/managing-vod-creation-for-webcasting-events) (<https://knowledge.kaltura.com/help/managing-vod-creation-for-webcasting-events>).

Webcasting Version 4.0.269 - December 2019 Release

Version: 4.0.269

Date Released: December 2019

Overview

These release notes pertain to Kaltura Webcasting version 4.0.269 , released December 2019.

This is a recommended update of the Kaltura Webcasting application. Once the Webcasting Producer Application launches, it will offer the user to download this version.

What's New?

The current release of the Kaltura Webcasting includes the following features to improve the management and usability of a Webcasting event.

- Show the display name in the moderator view instead of the user id. In the case that there is no display name, the user id will be shown as a fallback
- Fixed a bug where the real-time preview player in the producer application would cease to play
- Support Catalina OS

Component	Version
Webcasting Application (Mac, Windows)	4.0.269
Player	2.76.0
KMS	5.85.18

Webcasting Version 4.0.229 - June 2019 Release

Version: 4.0.229

Date Released: June 2019

Overview

These release notes pertain to Kaltura Webcasting version 4.0.229 , released June 2019.

This is a manual update of the Kaltura Webcasting application. The update will be done by manually downloading the Producer Application, The link will be sent via the Account Manager.

What's New

The current release of the Kaltura Webcasting includes the following features to improve the management and usability of a Webcasting event.

- Producers can now manage polls and slides without the need of being physically in the room with the presenter (different locations), this couldn't of been done in the past due to the latency of the preview that was shown in the Producer Application. Documentation can be found [here](https://knowledge.kaltura.com/help/kaltura-webcasting---presenter-real-time-preview) (<https://knowledge.kaltura.com/help/kaltura-webcasting---presenter-real-time-preview>)

Component	Version

Webcasting Application	
(Mac, Windows)	4.0.229
Player	2.75.5
KMS	5.85.18

Webcasting Version 4.0.214 - May 2019 Release

Version: 4.0.214

Date Released: May 2019

Overview

These release notes pertain to Kaltura Webcasting version 4.0.214 , released May 2019.

This is an optional update of the Kaltura Webcasting application. All users will be prompted to upgrade the next time they open the application.

Users can choose to upgrade the application or click Cancel and remain with the previous version of the Kaltura Webcasting Application.

What's New

The current release of the Kaltura Webcasting includes the following features to improve the management and usability of a Webcasting event.

- The [Webcasting Events Portal](https://knowledge.kaltura.com/help/webcasting-events-portal) (<https://knowledge.kaltura.com/help/webcasting-events-portal>) has been enhanced to consolidate all Kaltura Webcasting activity into one place.
- Users can now broadcast themselves using the camera connected to their computer (internal/external) without the need of any external encoder/hardware/software. See the article about [Kaltura Self-serve Webcasting](https://knowledge.kaltura.com/help/kaltura-self-serve-webcasting) (<https://knowledge.kaltura.com/help/kaltura-self-serve-webcasting>).
- Users that broadcast using the self serve feature can now share their screen instead of broadcasting their camera. See [Kaltura Self-serve Webcasting Global Settings](https://knowledge.kaltura.com/help/kaltura-self-serve-webcasting#shareScreen) (<https://knowledge.kaltura.com/help/kaltura-self-serve-webcasting#shareScreen>).
- Users that broadcast using the self serve feature can now broadcast audio-only instead of the self serve video. See [Kaltura Self-serve Webcasting Global Settings](https://knowledge.kaltura.com/help/kaltura-self-serve-webcasting#audio) (<https://knowledge.kaltura.com/help/kaltura-self-serve-webcasting#audio>).
- The Q&A character length has been increased from 200 to 500. See the [Kaltura Webcasting Attendee's Guide](https://knowledge.kaltura.com/help/kaltura-webcasting-attendees-guide#five_hundred) (https://knowledge.kaltura.com/help/kaltura-webcasting-attendees-guide#five_hundred) for more information.
- In both the Webcast Producer application and the Webcast Moderator application, the moderator can now copy the questions to the clipboard. See [Kaltura Webcasting Moderated Q&A - Managing Messages](https://knowledge.kaltura.com/help/kaltura-webcasting-moderated-qa---managing-messages#copy_clipboard) (https://knowledge.kaltura.com/help/kaltura-webcasting-moderated-qa---managing-messages#copy_clipboard).
- Added a "Copy to clipboard" button to the RTMP details in the Webcast Producer application. See [Editing a Webcasting Event](https://knowledge.kaltura.com/help/editing-a-webcasting-event#copy_clipboard) (https://knowledge.kaltura.com/help/editing-a-webcasting-event#copy_clipboard).
- Announcements can now be removed from the Webcast Producer application for all users, e.g. producer announces

that "The session will start in 5 minutes", after the session begins the producer can remove the announcement for all users. See [Kaltura Webcasting Moderated Q&A - Managing Messages](https://knowledge.kaltura.com/help/kaltura-webcasting-moderated-qa---managing-messages#new) (https://knowledge.kaltura.com/help/kaltura-webcasting-moderated-qa---managing-messages#new).

- Better Q&A management for events with a large number of incoming messages. See [Kaltura Webcasting Moderated Q&A - Managing Messages](https://knowledge.kaltura.com/help/kaltura-webcasting-moderated-qa---managing-messages#new_messages) (https://knowledge.kaltura.com/help/kaltura-webcasting-moderated-qa---managing-messages#new_messages).

Component	Version
Webcasting Application (Mac, Windows)	4.0.214

Webcasting Version 3.0.176 - January 2019 Release

Version: 3.0.176

Date Released: January 2019

Overview

These release notes pertain to Kaltura Webcasting version 3.0.176 , released January 2019 .

This is an optional update of the Kaltura Webcasting application. All users will be prompted to upgrade the next time they open the application. Users can choose to upgrade the application or click Cancel and remain with the previous version of the Kaltura Webcasting Application.

What's New

The current release of the Kaltura Webcasting includes bug fixes and performance improvements, including:

- Fix issue where slides appeared very small on external screen.
- Fix issue where the Q&A module did not appear in the producer application
- Fix issue where producer application was very slow to respond in some cases when the event was created long before the first broadcast.

Component	Version
Webcasting Application (Mac, Windows)	3.0.176
Player	2.73.2
KMS	5.81.09

Known Issues

Defect ID	Component	Summary
KMS-16380	KMS	Events that occur on Mondays between 12am-6am may not display correctly.
KMS-16537	KMS	The default date for a webcast event created from the Webcasting Calendar View is not the current day.
KMS-16261	KMS	In the Webcasting Calendar View, an Agenda without any scheduled events does not have the day or week indicated.

Limitations

Component	Summary
KMS	When a Webcast event is live and the end user is watching via the channel playlist, the slides are not displayed in the player nor is the Q&A module displayed.
Webcasting	When multiple applications are open before starting broadcast, once broadcast starts all applications will add the first slide. The user viewing will not be affected by this issue. Duplicate slides can be deleted from the VOD.
Webcasting	Thumbnails for slides are always stretched to 16:9 in the navigation menu.
Webcasting	The last 10 seconds of a video may be missing from the live event.
KMS	In KMS the "Launch the Webcast Application" button does not work on Windows 8 / Internet Explorer 11 when running as administrator.
Webcasting	User names with special characters such as !, ~, or *, are not supported in the Q&A Module.
Webcasting	Streaming video without audio is not supported.
Webcasting	Anonymous viewers can re-vote after returning to the poll from pause mode.
Webcasting	Users may experience slowness in the timeline interaction after moving a poll to a new position. This can be resolved by closing and re-opening the application.
KMS	The Download Module is not available for webcast events.
KMS	When using the BSE Module for a Webcasting event, the Webcasting BSE player is not used.
Player	Live HLS: Each time the player buffers, the latency increases. This is relevant only when the browser uses HLS-Flash. This issue does not occur in browsers supporting HLS.js.

Webcasting Version 3.0.82 - December 2017 Release

Version: 3.0.82

Date Released: December 2017

Overview

This is an optional update of the Kaltura Webcasting application. All users will be prompted to upgrade the next time they open the application. Users can choose to upgrade the application or click Cancel and remain with the previous version of the Kaltura Webcasting Application.

What's New

The current release of the Kaltura Webcasting includes the following new functionality:

- **Webcasting Moderators - Moderator View Interface** - The ability to define Webcasting Moderators for Kaltura Webcasting events (see [Media Collaboration](#)) had been added. A new Moderator View interface (See [Launching the Moderator View Application](#) (<https://knowledge.kaltura.com/help/kaltura-webcasting---launching-the-moderator-view-application>)) has been added for dedicated/assigned Webcasting Moderators.
- **Webcasting Administrators - Calendar View** - You can now add and assign Webcasting Administrators, see [Define Webcasting Admins](#), who can view and edit all organizational webcasts from the new Kaltura Webcasting Calendar View. See [Webcasting Events - The Webcasting Calendar](#) (<https://knowledge.kaltura.com/help/webcasting-events---the-webcasting-calendar>).
- **Kaltura Live Dashboard** - The Kaltura Live Dashboard has been added to the Kaltura Webcasting Producer Application. The Live Dashboard allows monitoring the live stream, including stream health indication and a preview player. For more information see [Accessing the Monitoring Dashboard and Viewing the Preview Live Feature from Kaltura MediaSpace](#).
- **Preview Live** - The Preview Live mode (beta) feature allows previewing the live webcast before going live to your audience. This streamlines dry-runs and preparations, while also saving post processing (i.e. trimming) of the webcast recording. For more info see [Kaltura Live- Preview Live](#).

NOTE: The Events Module has been deprecated from the Kaltura MediaSpace Management Console and is no longer required to activate the Kaltura Webcasting Application.

Component	Version
Webcasting Application (Mac, Windows)	3.0.82
Player	2.64
KMS	5.67.21

Known Issues

Defect ID	Component	Summary
WEBC-1067	Webcasting	The Polls results export is saved as .txt file instead of CSV.
KMS-16380	KMS	Events that occur on Mondays between 12am-6am may not display correctly.

KMS-16537	KMS	The default date for a webcast event created from the Webcasting Calendar View is not the current day.
Defect ID KMS-16261	Component KMS	Summary In the Webcasting Calendar View, an Agenda without any scheduled events does not have the day or week indicated.

Limitations

Component	Summary
KMS	When a Webcast event is live and the end user is watching via the channel playlist, the slides are not displayed in the player nor is the Q&A module displayed.
Webcasting	When multiple applications are open before starting broadcast, once broadcast starts all applications will add the first slide. The user viewing will not be affected by this issue. Duplicate slides can be deleted from the VOD.
Webcasting	Thumbnails for slides are always stretched to 16:9 in the navigation menu.
Webcasting	The last 10 seconds of a video may be missing from the live event.
KMS	In KMS the "Launch the Webcast Application" button does not work on Windows 8 / Internet Explorer 11 when running as administrator.
Webcasting	User names with special characters such as !, ~, or *, are not supported in the Q&A Module.
Webcasting	Streaming video without audio is not supported.
Webcasting	Anonymous viewers can re-vote after returning to the poll from pause mode.
Webcasting	Users may experience slowness in the timeline interaction after moving a poll to a new position. This can be resolved by closing and re-opening the application.
KMS	The Download Module is not available for webcast events.
KMS	When using the BSE Module for a Webcasting event, the Webcasting BSE player is not used.
Player	Live HLS: Each time the player buffers, the latency increases. This is relevant only when the browser uses HLS-Flash. This issue does not occur in browsers supporting HLS.js.
KMS	Archived VODs only appear in KMC and do not appear in KMS.

Webcasting Version 2.2.47 - July 2017 Release

Version: 2.2.47

Date Released: July 2017

Overview

This is an optional update and all users will be prompted to upgrade the next time they open the application. Users can choose to upgrade the application or click Cancel and remain with the previous version of the webcasting application.

NOTE: The Kaltura Webcasting application must be upgraded along with the player version. Users can choose whether to upgrade both the Kaltura Webcasting application to version 2.2.47 (and up) and the webcasting player to version 2.58 (and up), or they can choose to use previous versions for both player and webcasting application. A mismatch between the player version and the webcasting application version may result in functionality issues for webcasting events.

The current release of the Kaltura Webcasting includes the following new functionality:

- Improved support for DVR in webcasting events
- Fix issue where domain restrictions may result in slides not appearing
- Polls beta - update to functionality

Component	Version
Webcasting Application (Mac, Windows)	2.2.47
Player	2.58
KMS	5.61.29

Known Issues

Defect ID	Component	Summary
KMS-11617	KMS	Archived VOD only appears in KMC and does not appear in KMS.
PLAT-4816	BE	The first 12-24 seconds are missing from the live event.
FEC-3682	Player	Live HLS: Each time the player buffers, the latency increases. This is relevant only when the browser uses HLS-Flash. This issue does not occur in browsers supporting HLS.js.
KMS-10455	KMS	When using BSE module for a webcasting event, the webcasting BSE player is not used.
KMS-10375	KMS	Download module is not available for webcast events.
PLAT-4866	BE	The last 10 seconds of a video are missing from the live event.
WEBC-920	Webcasting Application	Users may experience slowness in timeline interaction after moving a poll to a new position. This can be resolved by closing and re-opening the application.

Limitations

Component	Summary
KMS	When a Webcast event is live and the end user is watching via the channel playlist, the slides are not displayed in the player nor is the Q&A module.
Webcasting	When multiple applications are open before starting broadcast, once broadcast starts all applications will add the first slide. The user viewing will

Webcasting	not be affected by this issue. Duplicate slides can be deleted from the VOD.
Component	Summary
KMS	In KMS the "Launch the webcast application" button doesn't work on Windows 8 / Internet Explorer 11 when running as administrator.
Webcasting	User names with special characters such as !, ~, or *, are not supported in the Q&A module.
Webcasting	Streaming video without audio is not supported.
Webcasting	Anonymous viewers can re-vote after returning to poll from pause mode.

Webcasting Version 2.2.41 - June 2017 Release

Version:2.2.41

Date Released:June 2017

Overview

This is a mandatory update and all users will be prompted to upgrade the next time they open the application. The current release of the Kaltura Webcasting includes the following new functionality-

- Fix issues where entitlement and access control caused an error in the application
- Fix issue where cue points were sent unnecessarily
- Polls beta - update to functionality

Component	Version
Webcasting Application (Mac, Windows)	2.2.41
Player	2.57
KMS	5.61.00

Known Issues

Defect ID	Component	Summary
KMS-11617	KMS	Archived VOD only appears in KMC and does not appear in KMS.

Webcasting	Anonymous viewers can re-vote after returning to poll from pause mode.

Webcasting Version 2.1.21 - November 2016 Release

Version: 2.1.21

Date Released: November 2016

Overview

The current release of the Kaltura Webcasting includes the following new functionality -

- Polls (BETA) - The application supports interactive polls as part of the broadcast. Producers and presenters can engage audiences through interactive polls. To learn more see [Kaltura Webcasting Polls \(https://knowledge.kaltura.com/kaltura-webcasting-polls\)](https://knowledge.kaltura.com/kaltura-webcasting-polls).
- Updated upgrade flow - Webcasting users will be notified when a new version is released upon opening the application and will be prompted to upgrade. Some version upgrades are mandatory and some may be optional.
- Video only event - When broadcasting video only without slides, the layout controls will no longer be visible.
- Presenter information is now available on the Details tab in the Webcasting Producer App.

NOTE: All users must upgrade the Webcasting application to match MediaSpace version update. The Webcasting application will prompt for upgrade next time it is launched.

Component	Version
Webcasting Application (Mac, Windows)	2.1.21
Player	2.50

Webcasting Version 2.0.143 - June 2016 Release

Version: 2.0.143

Date Released: June 2016

Overview

The current release of the Kaltura Webcasting includes bug fixes for the Archive feature.

NOTE: To use the archive feature, all users of the application must have version 2.0.135 and up.

Component	Version
Webcasting Application (Mac, Windows)	2.0.143
Player	2.44
KMS	5.45.00

Known Issues

Defect ID	Component	Summary
KMS-11617	KMS	Archived VOD only appears in KMC and does not appear in KMS.
PLAT-4816	BE	

FEC-3682 Defect ID	Player Component	Summary
KMS-10455	KMS	The first 12-24 seconds are missing from the live event. Live HLS: Each time the player buffers, the latency increases. When using BSE module for a webcasting event, the webcasting BSE player is not used.
KMS-10375	KMS	Download module is not available for webcast events.
PLAT-4866	BE	The last 10 seconds of a video are missing from the live event.

Limitations

Component	Summary
KMS	In KMS version 5.41.02 Webcast does not work in the channel playlist. This means that when Webcast is live and the end user is watching via the channel playlist, the slides are not displayed in the player nor are the Q&A questions and answers.
Webcasting	Remote storage is not supported for webcasting scenarios - Remote storage: webcast slides are not shown in "Remote only" configuration.
Webcasting	When multiple applications are open before starting broadcast, once broadcast starts all applications will add the first slide. The user viewing will not be affected by this issue. Duplicate slides can be deleted from the VOD.
Webcasting	Thumbnails for slides are always stretched to 16:9 in the navigation menu.
KMS	In KMS the "Launch the webcast application" button doesn't work on Windows 8 / Internet Explorer 11 when running as administrator.
Webcasting	User names with special characters such as !, ~, or *, are not supported in the Q&A module.
Webcasting	Streaming video without audio is not supported.
