Known Issues

The following are the known issues which Kaltura are working with Brightspace by D2L to resolve.

1. The issue where iFrame containing the BSE video does not allow full screen has been resolved by the Brightspace...
When creating LTI links via InsertStuff CIM (which is what Kaltura uses for the BSE) it causes duplicates in the External Learning Tools page.

D2L informs us that the issue is panned to be release on BrightSpace version 10.8.1 (May). Brightspace case ID: PRB0056775.
