- **Pop Up & Responsive Player** – The player pop up was removed from all Kaltura Mashup Tool embeds. In the standalone Mashup Tool (using ‘Course Content > Build Content > Kaltura Media’) the player is also responsive, meaning it will change its size when the browser’s dimensions change. (1)

Since this change will only affect newly embedded content, we recommend re-embedding any content you want to move to an in-page player.

- **Grading ‘Points Possible’** – This version contains the ability to choose the “points possible” for the IVQ submission through the BB ‘Assesments’ workflow. When the IVQ is added to a course, you can choose a distribution of points other than 1-100. (2)
