

Interactive Video Paths Overview

Last Modified on 06/06/2024 11:12 am IDT

 This article is designated for all users.

Kaltura Interactive Video Paths enable you to add choice-based learning paths to your videos, inviting your audience to engage and participate. With Interactive Paths, you can customize your content to create a more personalized, "choose your own adventure" experience for each of your users. You can create, share and embed video paths in your website, LMS, or MediaSpace Video Portal to increase engagement, enhance learning, and boost conversion.

Filtering Interactive Video

1. Access your Video Portal or KAF applications.
2. Select My Media from the User menu.
3. Click Filters.
4. Check the **Interactive video** to display all your interactive video projects.
