How can I add an image background to a hotspot?

Last Modified on 05/04/2025 2:37 pm IDT

You can customize a hotspot by adding a background image using CSS. This is a great way to make your hotspot more eye-catching and visually connected to your video content.

To add an image background to a hotspot:

1. Open the video in the hotspot editor.
2. Select the hotspot you want to style.
3. Scroll down to the "Advanced styling" or "Custom CSS" section.
4. Paste the following code into the custom CSS field:

```
background-image:
url("https://images2.minutemediacdn.com/image/upload/c_fill,g_auto,h_1248,w_2220/f_auto,q_auto,w_1100/v1555927957/shape/mentalfloss/565grumpycat1_5.jpg");
background-size: 300px 200px;
color: rgba(100.00%, 100.00%, 100.00%, 1.00);
font-size: 45px;
```

Customize as needed:

- Replace the image URL with your own.
- Adjust the background-size to control how large the image appears.
- Modify the text color and font size for readability.

> ✅ Use high-contrast combinations so your text stands out clearly against the image.
