

Setup a Media Registration Form

Last Modified on 07/22/2024 5:09 pm IDT

 This article is designated for administrators.

Read this article to learn how to configure a registration form that safeguards the video content to be shown only to users who have registered.

Use the Registration Module to:

- Set a registration form for your media (see types below).
- Download a report of all the users that registered via the registration form
- Short links to the event with an expiration of 1 year will be set to Outlook calendar invites

A registration form may be added for the following types of entries:

- ✓ Webcast
- ✓ Live
- ✓ VOD
- ✓ Quiz
- ✓ Meeting Rooms

 The registration module is unsupported by the [Video Portal Theming Feature Set](#). We recommend you register to the [Release Notes](#) for updated information on new feature releases of Kaltura products!

Configure the Registration Form(s)

The Registration Form is set up in the Kaltura Management Console (aka KMC) as a [Custom Data Schema](#). The schema contains the fields for the registrant to complete.

1. Login to the KMC.
2. Go to Settings and select the Custom Data tab.

3. Click Add Custom Schema to add a schema.

Add Custom Schema [Cancel](#)

Custom Schema Title *

Description

System Name

Apply to Entries Categories User Entry

<input type="checkbox"/>	Field Label	Field Type	System Name	Short Description	Description	Max Values	Searchable
--------------------------	-------------	------------	-------------	-------------------	-------------	------------	------------

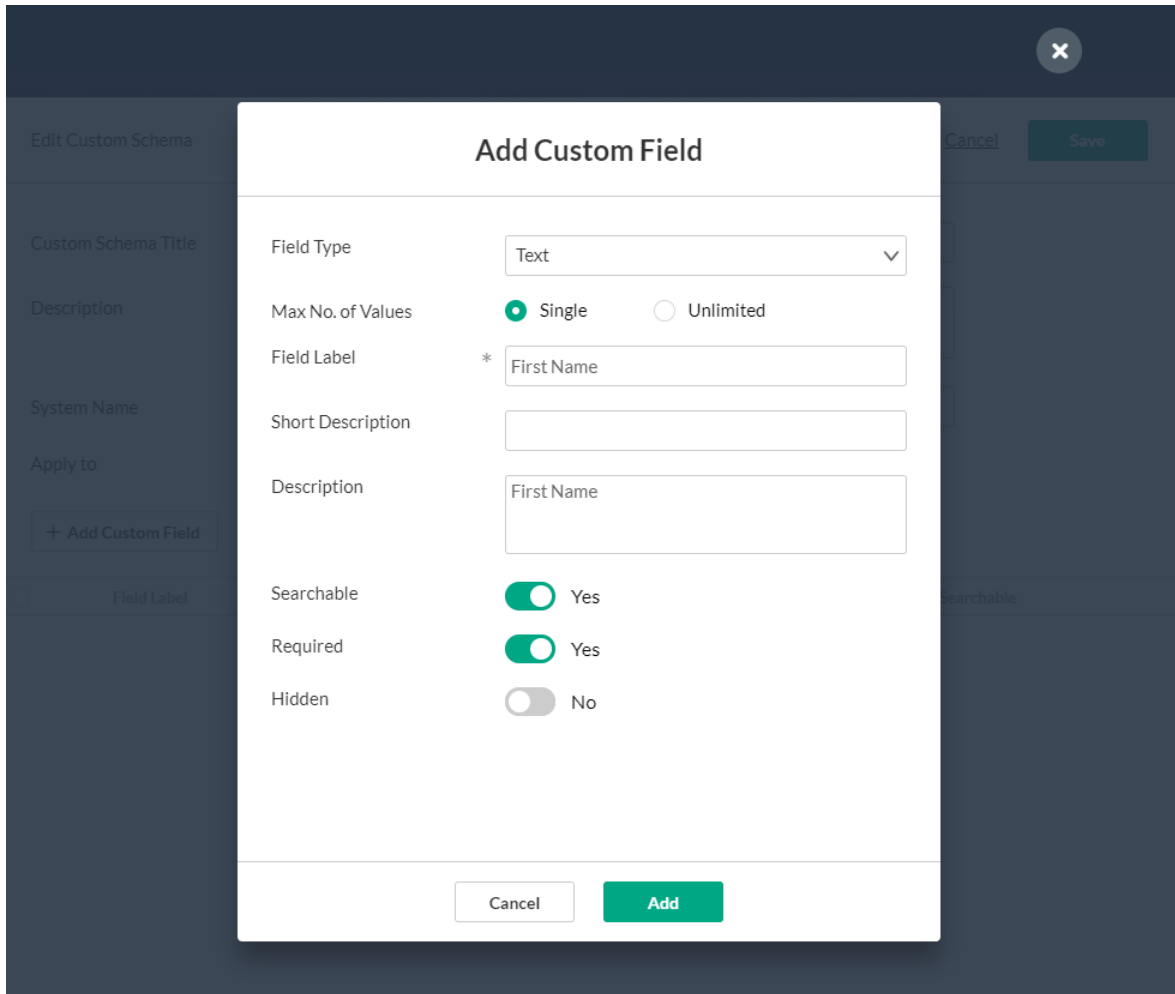

No Results

4. Enter the Custom Schema Title and a Description.
5. Select **User Entry** to ensure that that the custom data schema that is created will be available in the Registration module. You may create as many registration forms as you need.

 **The schemas found in the Custom Data tab are essentially registration forms as long as they are configured on the user-entry option. Multiple registration forms can be made available per KMS instance.**

6. Add the custom fields. The supported field types are: **Input Field, Drop List**. Each field that is added has two additional configurations:
 - a. Required - require the user to fill in that field and will not allow them to submit the form otherwise
 - b. Hidden - hide the field from rendering in the registration form. You might want to use this option for a field you aren't sure that you want to use thus allowing you to show/hide the field on demand without the need of replacing the form
7. The default fields for the registration form that is included in the Registration module are:
 - a. First Name
 - b. Last Name
 - c. State
 - d. Country

For more information on how to add or edit custom data see [Custom Data](#).

Add Custom Field

Field Type: Text

Max No. of Values: Single Unlimited

Field Label: * First Name

Short Description:

Description: First Name

Searchable: Yes

Required: Yes

Hidden: No

Buttons: Cancel, Add

The following is an example of a Custom Data Registration Form Schema:

Edit Custom Schema [Cancel](#) [Save](#)

Custom Schema Title *

Description

System Name

Apply to Entries Categories User Entry

[+ Add Custom Field](#) [Download Schema](#)

<input type="checkbox"/>	Field Label	Field Type	System Name	Short Description	Description	Max Values	Searchable
<input type="checkbox"/>	<input type="text" value="a"/> First Name	Text	FirstName		First Name	1	Yes
<input type="checkbox"/>	<input type="text" value="a"/> Last Name	Text	LastName		Last Name	1	Yes
<input type="checkbox"/>	<input type="text" value="☰"/> State	Text select list	State		Select the State you a located in.	Unlimited	Yes
<input type="checkbox"/>	<input type="text" value="☰"/> Country	Text select list	Country		Select the country you are located in.	Unlimited	Yes

8. Click Save.

Configure the Registration Module

Kaltura Registration is managed by KMS and KAF system administrators in the Admin area accessed from <Base_URL>/admin (e.g. <https://videos.mediaspace.kaltura.com/admin>)

1. Login to the application Configuration Management window.
2. Scroll down and select the [Registration module](#) in the Modules/Custom/core section.

ModulesCustom/core

Kwebcast

[Registration](#)

The Registration Administration page is displayed.

3. In the Enabled field, select Yes to enable the Registration module.

Save

4. Select all the forms that you would like to make available within that KMS instance from the list of Registration Forms .
5. Select the [Role\(s\)](#) that are able to setup the Registration Form for an entry.
6. Enter the mediaPlayer ID, this is the player that will play media on the registration page
7. Click Save.

Field	Description
enabled	Enable, the Registration Module.
registrationForms	Select an available registration form for the entry.
registrationSetupRole	<div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 5px;">privateOnly Role ▼</div> Choose the minimal role required to setup registration for an entry.
mediaPlayer	Select the Media Player.

Activate the Registration Form for an Entry

1. Login to KMS/KAF applications.
2. Select a media you own/can edit and navigate to it's editing page.
3. Select the Registration tab.
 - a. Set up registration page - select the desired custom data profile ID. Add media to the registration page (optional)

SET UP REGISTRATION PAGE

Select Form:*
RegistrationProfileId

This field is required.

Add Media:
Enter Media URL or Media ID

Media that is added to the registration page will become available to anyone who views the Registration page.

b. Display settings - Set the boxes of the desired registration page elements such as Header banner, Title, and Description.

DISPLAY SETTINGS

Select the components you would like to include on your registration page.

Header Banner ?

Title ?

Description ?

c. Email validation - Upload or enter a closed list of emails and configure their permissions for the event.

EMAIL VALIDATION

Upload or enter a closed list of emails and configure their permissions for the event.

Upload a CSV or a XLS file, placing each restricted domain in a new line. To block all users from a specific domain, enter the domain name, e.g., "youtube.com". To block a user name from all domains, enter "username@".

Include Exclude

Upload CSV File

0/150 Emails

d. Share registration page - link to share the registration page.

Customize Registration Page

Select & customize the settings for your registration page.

- SET UP REGISTRATION PAGE >
- DISPLAY SETTINGS >
- EMAIL VALIDATION >
- SHARE REGISTRATION PAGE >

Registration info saved. ×

Save

Save & Preview

Enable Registration Page

4. Select Save or Save & Preview
5. Select Enable Registration page.
