

Transfer media you own to others in legacy Video Portal

Last Modified on 06/04/2026 9:15 am IDT

 This article is designated for all users.

About

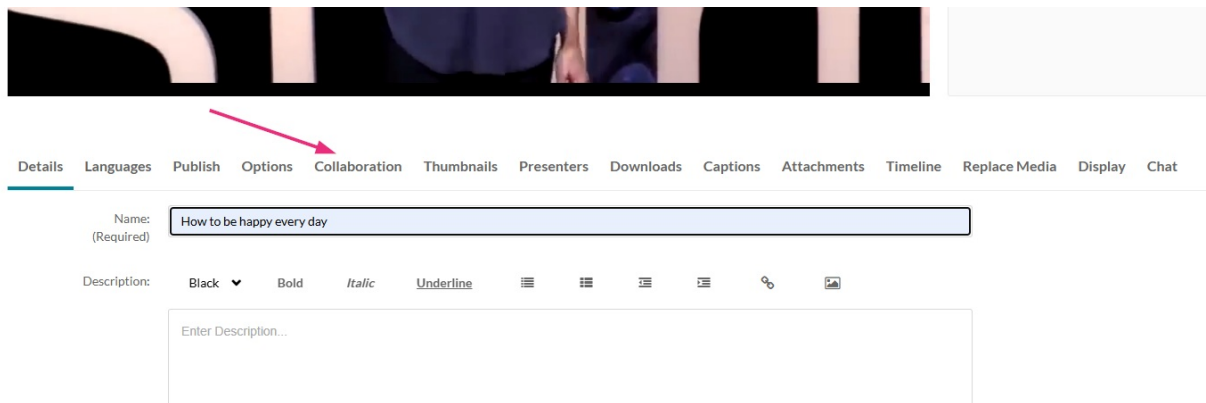

Media owners can transfer ownership to an individual or a group.

 If you cannot access this functionality, ask your administrator to give you the required permission.

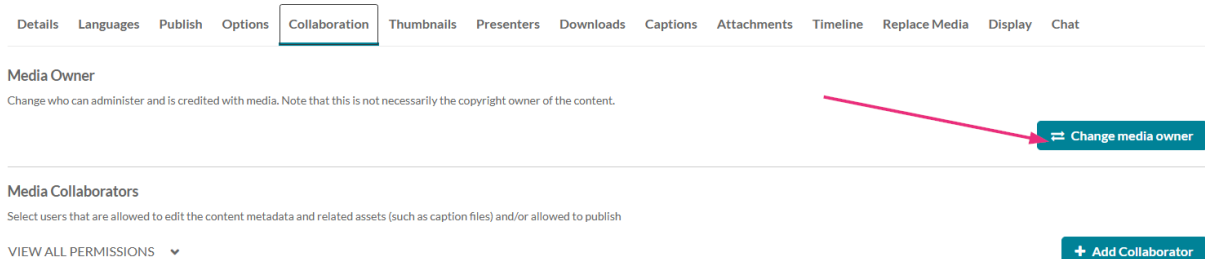

These instructions apply to the **legacy Video Portal**. If you're using the Theming-based Video Portal, please refer to the [Content Hubs category](#).

Change ownership

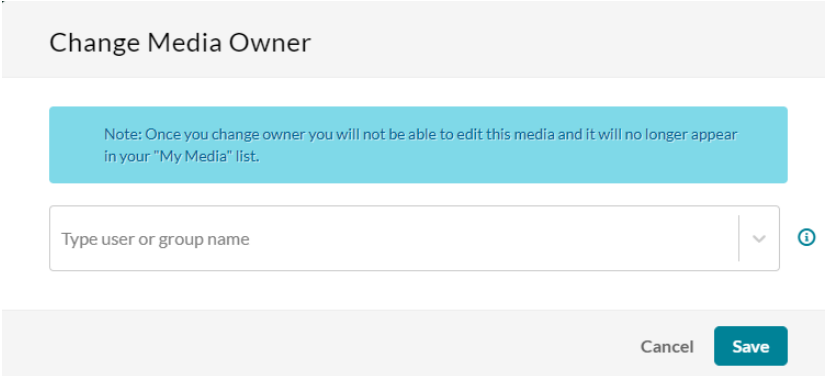

1. Access the [edit media page](#).
2. Click on the **Collaboration** tab.

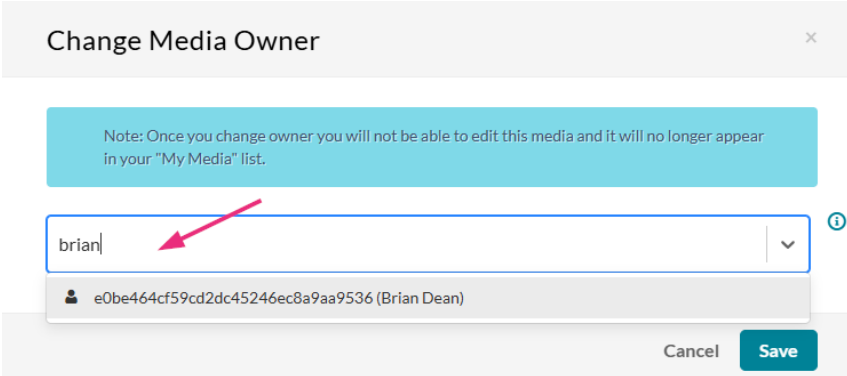

3. On the Collaboration page, click **Change media owner**.

The 'Change Media Owner' window opens.

4. Enter the user/group name for the new owner. You can add users/groups that are available on the site and then use the auto-complete function (from third letter and on), and press enter on your keyboard.

5. Click **Save**.

Once ownership is transferred, the new owner gains full access to the media, including the ability to [edit](#), [publish](#), and [delete](#) it.
