

## Kaltura Meetings Overview

Last Modified on 10/07/2020 9:19 pm IDT

### Introducing Kaltura Meetings

Version 1.5

Kaltura's online virtual classroom solution, Kaltura Meetings provides easy-to-use virtual classrooms purposely built for online instruction. With a click of a link, student/users and instructors/managers alike can engage one another as if being in the same room. Student/Users and instructors/managers do not need to download anything to fully participate. Kaltura Live Rooms virtual classrooms are 100% browser based making getting started an absolute breeze. Kaltura Live Rooms virtual classrooms are fully brandable to highlight your organization's branding as you engage your learners through interactive tools like a digital whiteboard, screen sharing, breakout rooms, real time notes, live quizzes and a whole lot more. Kaltura meets students and users where they are by providing an optimized experience for those joining via their smartphone or tablet without the need to install another app on their device.

### Kaltura MediaSpace Virtual Classroom & Webinar Module

#### Overview

The Kaltura Newrow Module allows you to open a real time Live Room from a Kaltura Channel or your own personal real time Live Room from the Kaltura Mediaspace or KAF Application User menu.

It is possible to select and play Kaltura media from the channel or user for synchronous playback from within the Kaltura Live Room. The real time session can be recorded and is automatically uploaded to the Kaltura Channel or My Media.

#### Technical Implementation

To access the Kaltura Live Room (Newrow) module, users must join from WebRTC supported browsers:

- PC - Chrome, Firefox
- MacOS - Chrome, Firefox
- Android - Chrome,
- iOS - Safari

See the [Kaltura Live Room Recommended System Requirements](#) for more information.

#### [Kaltura Meetings Administrator's Guide](#)

## Known Limitations

Kaltura Live Rooms are fully supported in the following browsers:

- Chrome (PC, MacOS, Android)
  - Firefox (PC, MacOS, Android)
  - Safari (iOS).
  - Edge for PC and Safari for MacOS coming soon.
-
