

Kaltura Lecture Capture Essentials and Admin - Overview & Exercises

Last Modified on 02/24/2020 4:24 pm IST

Let's Practice

This practice is for administrators only.
Please make sure to install "Kaltura Classroom" application before you start.

Login to your MediaSpace/ KAF account (the environment Lecture Capture was enabled).

Create a Recording

1. Launch the "Kaltura Classroom" application, if the Authentication module is enabled, you will be asked to log in.
2. Make sure that you have the proper input devices set according to your needs.
3. Click on the big red button to start recording.

4. When done, click "Stop" to end the recording session.

Edit a Recording

1. Go to your recording media page. Click on the "Actions" menu and select Edit.
2. Add a "training" tag via "Details" tab.
3. Change the entry's thumbnail by grabbing a frame from the video itself.
4. Add an attachment.

Configure the RecScheduling Module

1. Go to the MediaSpace or Kaltura Application Framework Admin page and locate the "RecScheduling" module (login with your KMC credentials).
2. Set the "enable" field to "Yes".
3. Configure the selected users under "AllowedUsers". These are the users that will be allowed to schedule events. The users will be automatically added to the 'RecordScheduleGroup' group.
4. Save the changes.
5. Reload your MediaSpace / LMS and confirm that the specified users can schedule events.
