

## On Demand: Allow Participants to Download Shared Files

Last Modified on 10/07/2020 9:04 pm IDT

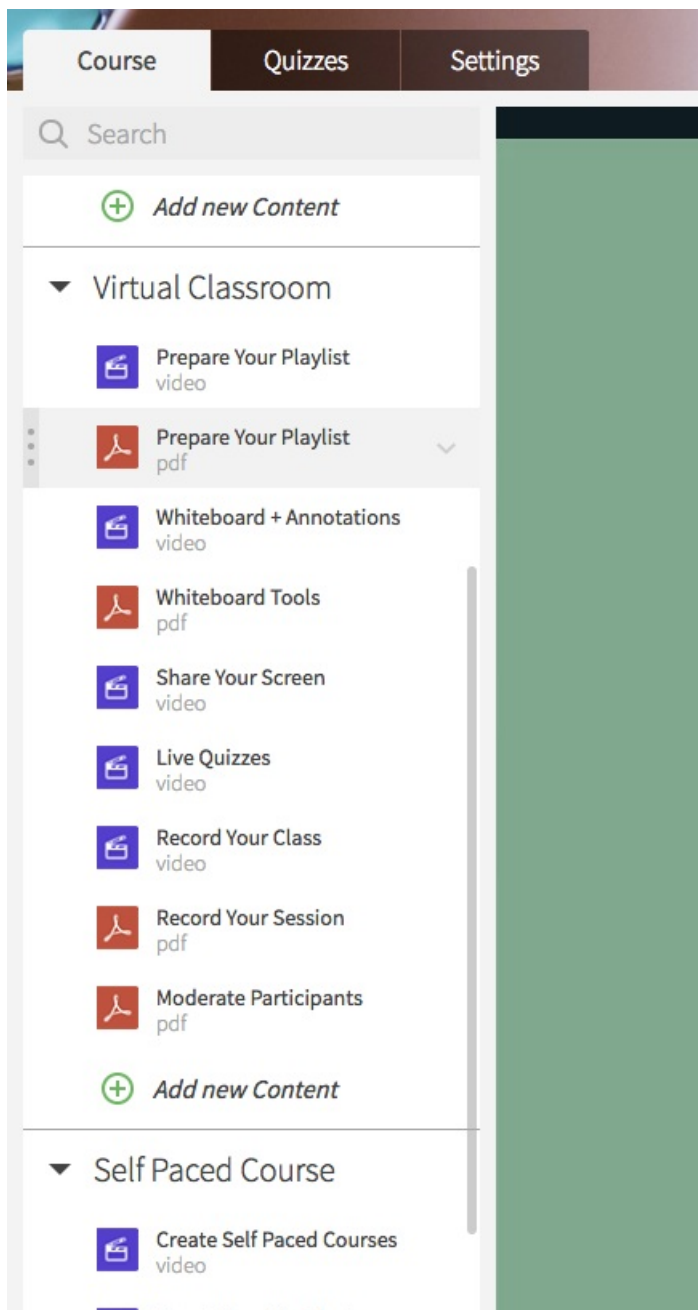

You can allow participants to download shared files by enabling them to download files added to the on-demand course.

### Allow Participants To Download Shared Files

By default, files added to an on-demand course are NOT downloadable. To allow participants to download shared files, take the following steps:

#### Step 1

- Hover your cursor over the file you want to allow your participants to download.

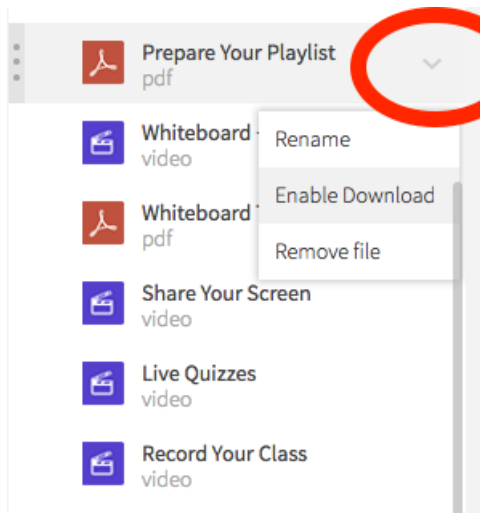

### Step 2

- Click the **v** drop down corresponding to the file.

### Step 3

- Click the **Enable Download** option.

**That's it.**

Your participants will be able to download that file directly from the on-demand course.
