

Accessing Session Stats

Last Modified on 09/11/2024 5:42 pm IDT

This article provides insights into your live sessions such as attendance data, chat history, browser focus information, and quick links to applicable recordings.

What Are Session Stats?

Session Stats provide instructors and Virtual Classroom administrators statistics on the sessions offered within their organization. Instructors can access data related to the sessions they teach while administrators can access data from all sessions offered within their Virtual Classroom. The data points available are:

- **Session overview** - List view of live sessions that took place in the specified date range with information around: Instructor/s, number of students, duration, start time, end time, and whether a recording took place.
- **Recordings** - Preview recordings that took place in specified sessions
- **Attendance list** - See a list of participants that joined each live session: Name, role, email, time entered, time exited, and duration of attendance.
- **Attention** - See focus or attention reports corresponding to each session, non-moderator participant. Value is returned based on overall % of time participant was focused on the session while they were joined. See [Browser Focus](#) for more information.
- **Chat history** - See a record of chat history entered throughout the session.
- **Quick Polls** - See poll results and statistics for each poll taken during a session.

Access Session Stats

To access Session Stats you must be either an instructor or administrator in a paid account.

1. You must have already connected to your Kaltura Meetings live room for the first time to proceed.
2. Go to smart.newrow.com (you will be automatically logged in).
3. Sign into your Kaltura account if you are not already signed in.
4. Select **Session Stats** in the upper bar.

☐ System admins or instructors will be logged in automatically if they already signed in and connected to the live rooms via Mediaspace or LMS.

Filter Stats By Session

Want to see data about one or a few sessions? Then use the course (session) filter.

1. Click the **drop-down-menu** that says **All Courses** by default.
2. Select the course (session) or courses you want to see data on.

☐ To reset the filter, deselect your selections.

Change The Date Range

Session Stats shows the data from your sessions in the last 7 days. You can set a custom date range.

1. Click the **start date** or **end date** to display the calendar menu.
2. Click the left navigation arrow to show previous months.
3. Select start date (earlier than end date). If you'd like to change the end date, then select that next.

☐The date range of data is automatically updated. Just scroll through the table to find the session stats you're looking for.

The screenshot shows the Kaltura Session Stats interface. At the top, there's a navigation bar with 'KALTURA Kaltura Campus', 'Courses', 'Users', 'Files', 'Session Stats', '40%', and 'Learning Center'. Below this, the 'Session Stats' page is displayed. It features a dropdown menu for 'All Courses' and a date range selector set to '06 Jul 2020 → 13 Jul 2020', which is circled in red. To the right of the date range is an 'Export' button. Below the date range are two calendar views for July 2020 and August 2020. The July 2020 calendar shows dates 6 through 13 highlighted in green. On the left side, there are summary cards for 'Sessions' (30) and 'Students' (44). Below these are three session entries: 'Sync Call - Jul 13', 'NR2 For You - Jul 13', and 'NR2 For You - Jul 13'. Each session entry has an instructor name and a duration.

See Who Joined Your Sessions

You can check the session statistics of each individual session held.

1. Click **Session Stats**.
2. Select the name of the session you want information on.
3. Scroll to the **Participants** section.
