

Is Your Webcam or Microphone Blocked by Internet Security Suites?

Last Modified on 10/22/2020 12:49 pm IDT

When activating your devices in a Kaltura Live Room, you might see a Webcam Unavailable popup if your devices are unavailable due to an installed security suite blocking access to your devices.

Internet Security Suites

If you are using an internet security suite, it might be blocking access to your webcam. To allow Kaltura to access your webcam, you will need to disable the security suite function that is blocking access to your webcam and microphone.

We have listed some of the most common internet security suites below to walk you through the quick steps to enable your webcam:

- AVG
- Bitdefender
- eset
- Kaspersky

AVG

1. Open *AVG Internet Security*.
2. Click on **Privacy**.
3. Click **Webcam Protection**.
4. Turn *Webcam Protection* OFF.
5. Close *AVG Security Suite* and refresh your Kaltura Live Room.

Bitdefender

Bitdefender[®]

1. Open *Bitdefender Internet Security*.
2. Select the **Privacy** option.
3. Click **View Features**.
4. Click on the settings icon within the *Webcam Protection* section.
5. Turn off the switches corresponding to *Block all access to the webcam* and *Block browsers' access to the webcam*.
6. Close the Bitdefender security suite and refresh your Kaltura Live Room.

Eset

1. Right-click the ESET tray icon and click "Advanced setup".
2. In the left-hand panel, click "DEVICE CONTROL".
3. In the main panel, click "WEBCAM PROTECTION".
4. To the right of "Rules", click "Edit".
5. A new window appears which will list all webcam rules that you have created, if any.
6. In the **Rules** window, select the rule you want to change and then select "Allow access". Click **OK** to save your changes.
7. Close the ESET security suite and refresh your Kaltura Live Room.

Kaspersky

1. Open *Kaspersky internet security*.
2. Click on **Privacy**.
3. Click on stop blocking.
4. Close *Kaspersky internet security* and refresh your Kaltura Live Room.
