

Working with the Category Analytics Dashboard

Last Modified on 05/10/2021 4:00 pm IDT

The Category Analytics dashboard provides you with data on the category's usage in the platform. To learn more see the article on [Category Analytics](https://knowledge.kaltura.com/help/category-analytics) (<https://knowledge.kaltura.com/help/category-analytics>).

In this article, you can review:

- [How to change the time frame for the dashboard](#)
- [How to compare between different time periods](#)
- [How to filter the data](#)
- [How to export reports to a CSV file](#)
- [How to filter the Category Page Views](#)

The filters are automatically applied to all elements of the dashboard.

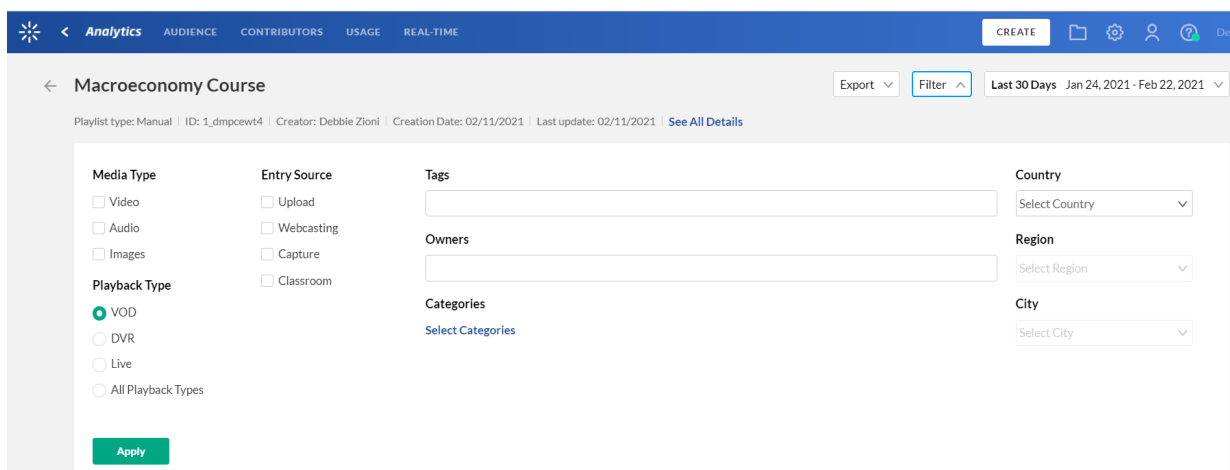

As a reference for analytics terms and definitions, please see the [Advanced Analytics Terminology](https://knowledge.kaltura.com/help/advanced-analytics-terminology) (<https://knowledge.kaltura.com/help/advanced-analytics-terminology>) article.

Filter the Data

You can filter the data in the dashboard based on additional dimensions such as the location, tags, categories and more.

To filter the dashboard data based on a specific parameter

1. Click on the Filter option to open the Filters pane.
2. Fill in the relevant filters you would like to use.
3. Click Apply to show the filtered data in the dashboard.

The filtering options are:

- Media Type(s) - video, Audio, and/or Images
- Playback Type

- Entry Source - the source of the content ingested to the system. Content can be uploaded, created via Kaltura's Capture Suite, live streamed, or created in many other ways.
- Tags - the tags on the content
- Owners
- Categories - click Select Categories to select from the list of categories.
- Country, Region City

Export to CSV

All analytics tabs have the option to Export to a CSV.

Click Export to open the drop down list and select the data you would like to export. One or more options may be selected.

A notification is sent about the export request status. If the data in the report was filtered, the report is based on the filter applied. You will be notified that your export request is being processed and will be emailed to you when completed. Note that export is limited by number of records and time to execute. If you receive an error, break down your report to smaller time frames or use filters to reduce the size of the report.

NOTE: The files expire in 7 days.
