

What happens to a video link if the video title changes?

Last Modified on 05/01/2025 6:38 pm IDT

If your video portal is set to include the full video title in the URL, don't worry, changing the title won't break the link.

The title in the link is just for readability and search engines. The portal uses the unique video ID in the URL to find and load the video. You can even remove or replace the title in the link **as long as the video ID stays the same, the link will still work.**
