

# Can we change the video or the slides after the webcast event?

Last Modified on 07/13/2020 11:17 pm IDT

After the webcast event is over, you may not use the "[Replace Media](#)" feature to replace the video stream as a whole. Note that this will override the original recording and the slides as well (if available). To upload/edit/delete slides you may use the "[Timeline](#)" feature.
