

Who can launch a Live Room that is associated with a Channel?

Last Modified on 08/26/2020 1:29 pm IDT

A Live Room that is associated to a channel may be launched by the channel owner/manager/moderator. The user that launches the live room becomes the room host and has an instructor view inside the room. Only after the room session is initiated by the channel owner/manager/moderator, the room will become accessible for other participants.
