

How Can I Upload a PowerPoint Presentation with Audio?

Last Modified on 09/26/2021 4:06 pm IDT

Presentations go through a conversion process upon being **uploaded** (<https://knowledge.kaltura.com/help/upload-files-to-share>) into the live room, which render them into a series of slides without multimedia elements like animation or audio.

So, consider:

1. sharing your screen and allowing audio.
2. **uploading a movie or audio file** (<https://knowledge.kaltura.com/help/upload-files-to-share>) into the room if relevant.
3. another option is Kaltura Capture, where you can capture multi-screen recordings, easily record video synced with PowerPoint, or capture your screen.
