

Is Kaltura Meeting Available in Both KMS & KAF Applications?

Last Modified on 10/13/2020 8:24 pm IDT

Yes, Kaltura Meeting is available both in MediaSpace and Kaltura Application Framework (KAF).

Two types of Live Rooms may be launched from **MediaSpace**:

- A private Live Room that is associated with a user ID.
- A channel Live Room that is launched by a channel manager or moderator.

In **Kaltura Application Framework**, each Media Gallery is associated with one dedicated Live Room that can be launched by the media gallery manager or moderator.
