

# How is Entitlement Maintained?

Last Modified on 10/13/2020 8:26 pm IDT

Users can force sign in or they can allow access to the Live Room - both channel rooms and personal rooms - via a direct link without the need to sign into KMS.

By default, KMS users (managers in the channel, or personal room owners) have the ability to [invite participants directly to the live room](#) without the need to sign in to KMS.

To disable the default, please inform the Kaltura Meeting team. *Invite* as well as *Guest Access* can be disabled.

If *Guest Access* is disabled, then live room participants can join in the following methods:

- Channel Room - Go to the channel where the Live Room resides and click **Launch Live Room**. The participants must have membership to the channel.
- Personal Room - Each personal room resides on a unique KMS page. The room owner can copy the URL to the page and share it with participants. Participants must have access to the KMS.

NOTE: Anyone with access to the KMS will be able to access the room as participants.
