

# Wochit - Organizing Media On the Timeline

Last Modified on 04/19/2022 4:36 pm IDT

This article describes how to organize your assets on the Timeline and create a "rough cut" of your video.

## To add media to your Timeline

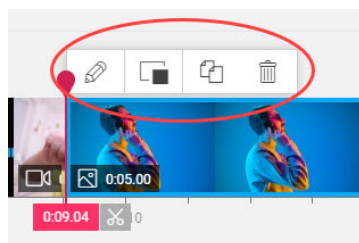

Click and drag assets from your Lightbox to your Timeline.

## To edit your Timeline

After an asset is placed on the timeline, you may drag it, trim it, or change its duration.

A menu bar displays above the asset:

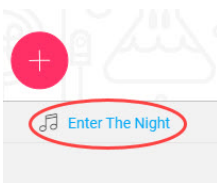

Icon	Name	Description
	Edit	Add texts and post production effects to your video.
	Collage	Add assets on top of your video for cutaways, split-screen, or picture-in-picture effects.
	Duplicate	Duplicate the assets (along with all of the post production effects that are set).
	Delete	Remove media from the timeline.

## To add music to your video

Wochit's Audio Library is home to hundreds of pre-licensed music tracks which can be searched by tempo, genre, and mood. Favorite the tracks you love to share with teammates, or upload your own music with ease.

Click on the music below the **Search Media** button.

The Background Music window displays.

**Background Music** ✕

Search  Mood: All ▼ My Uploads  Favorites  Upload

Track <span>↕</span>	Creation <span>↕</span>	Genre <span>↕</span>	Mood <span>↕</span>	Pace <span>↕</span>	
Enter The Night	03/30/2020	Ambient	Mysterious	Medium	✓ In Use
Down the Alleyway	03/30/2020	Ambient	Sad	Medium	
First Responders	03/30/2020	Ambient	Mysterious	Slow Medium	
Down the Spiral	03/30/2020	Ambient	Neutral	Slow	
Slow Motions	03/30/2020	Drama	Sad	Medium	
Ambivalence	03/30/2020	Ambient	Mysterious	Medium High	
Boost	03/30/2020	Ambient	Hopeful	Medium	
Duality	03/30/2020	Ambient	Sad	Medium	
The Light from Within	03/30/2020	Ambient	Hopeful	Slow	
Trembling Anticipation	03/30/2020	Ambient	Neutral	Slow Medium	

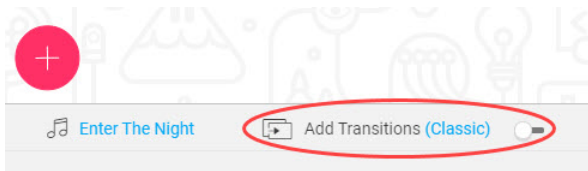

Close

Here you can browse, listen to, and select music for your video. You can even upload your own music files.

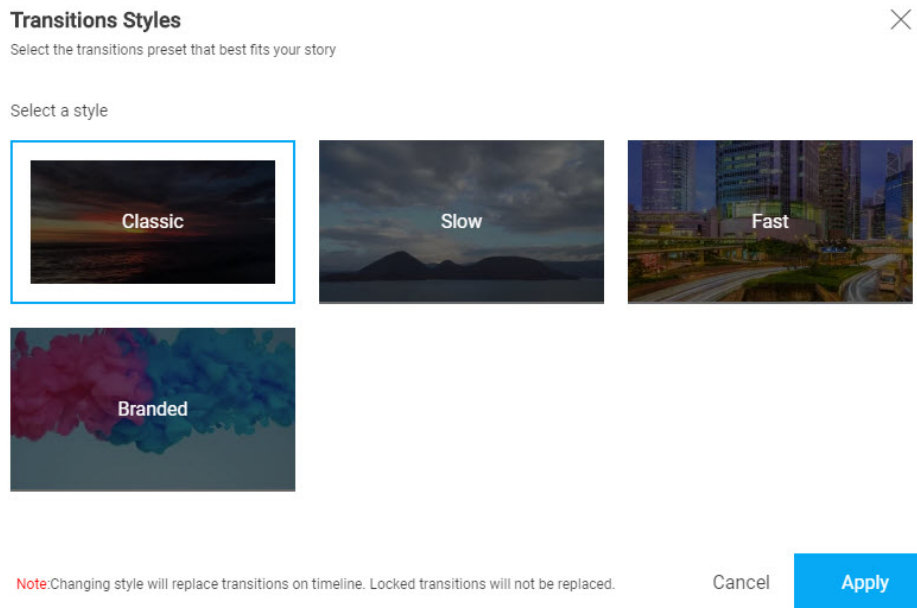

## To add transitions

By applying transitions to your entire Timeline, you can define the pace and style of your video. Later on, you can override these transitions in the context of each asset.

Click on transition style to the right of music.

The Transitions Styles window displays.

Here you can preview and select the transition style for your video.
