

Browseandembed

Last Modified on 12/08/2020 10:34 pm IST

This module controls the way users can use the Browse, Search & Embed (BSE) tool.

- Please make sure players are set. We recommend to make sure that a value for the 'BSEPlayerId' field is entered.
- Note that depending on the LMS/CMS used, the feature set might be different. For additional information for users, see [Using the Browse Search and Embed \(BSE\) Feature](https://knowledge.kaltura.com/help/using-the-kaltura-browse-search-and-embed-bse-feature) (<https://knowledge.kaltura.com/help/using-the-kaltura-browse-search-and-embed-bse-feature>).

The BSE tool is available within the Rich-text (if installed) editor wherever it is available for example:

- Assignments
- Forums
- Announcements

Sakai: This tool is available within the CK editor wherever it is available.

The [Browse Search and Embed Administrator's Guide](#) includes a comprehensive description on how to configure this module.

Fields	Description
enabled	Enable the Browseandembed module.
returnUriMethod	Which method to use for the return url action. Get or Post.
allowEmbedFromMultipleCourses	Defines how many categories to include when embedding media. When set to Yes, users will be able to embed videos from Media Galleries of all the courses they have access to. Set to No if you want to limit users to the Media Gallery of the current course only.
