

# Audioentry

Last Modified on 02/04/2021 1:23 pm IST

This module allows you to set a dedicated player (different than the default KMS player) for audio entries.

Field	Description
customPlayerId	The player ID (uiConf ID) of the player that plays audios. Leave blank to use the KMS default player.
playerBarHeightPixels	The height (in pixels) of the custom player UI is not part of the actual video (for example - the bottom bar). Leave blank to use the default player value.
playerVideoRatioPercent	The ratio between the width and height (in percent) of the player's asset area. Standard values: 16:9 = 56.25 , 4:3 = 75 , 16:10 = 62.5. Leave blank to use the default player value.
embedSizes	<p>Set the sizes that can be used for embedded players.</p> <p>set the player size in the following format: {width}x{height}. This setting requires a custom player.</p> <p>If a custom player is not specified, the audio entry uses the default video player.</p> <p>To learn about how to embed a media item, please see <a href="https://knowledge.kaltura.com/help/sharing-and-embedding-media">Share and Embed Media</a> (<a href="https://knowledge.kaltura.com/help/sharing-and-embedding-media">https://knowledge.kaltura.com/help/sharing-and-embedding-media</a>).</p>
