Public YouTube video content and metadata can be added to MediaSpace and KAF applications.

**NOTE:** YouTube content can be played on the Kaltura V2 player from version 2.13 and above. To update the player version, refer to [How to Update the Kaltura Player to the Latest Version](https://knowledge.kaltura.com/help/how-to-update-the-kaltura-player-to-the-latest-version) (<https://knowledge.kaltura.com/help/how-to-update-the-kaltura-player-to-the-latest-version>)

Because the video itself still ‘resides’ on YouTube, a YouTube entry is treated differently in some ways from a native Kaltura entry.
