About

The **Cssupload module** lets you change the look of your site with your own CSS. You can replace the default Bootstrap style, add your own styles, or add styles that apply only to Theming pages, which Content Hubs uses.

Configure

1. Go to your Configuration Management console, locate the **Cssupload** module in the left panel, then select it. You can also navigate directly using a link:
   `https://{your_site_url}/admin/config/tab/cssupload`
   The **Cssupload** page displays.

2. Configure the following:
   - **enabled** - Set to **Yes** to enable the module.
   - **bootstrap** - Upload a CSS file to replace the default Bootstrap file.

     The **bootstrap** file works only on legacy Video Portal pages. For Content Hubs, use **themingAdditional**.

   - **additional** - Upload a CSS file with your own styles. These styles don't load on Theming pages.
   - **themingAdditional** - Upload a CSS file that applies only to Theming pages.

   In each section, click **Upload CSS file** to upload a file from your computer. To remove a file, click **Remove**.

3. Click **Save**.
