 This article is designated for administrators.

About

The **Cssupload module** lets you customize the look and feel of your Video Portal by uploading your own CSS files. You can add extra styling, override default styles, or apply changes specifically to Theming pages. CSS files can be uploaded directly or linked from an external URL.

Configure

1. Go to your Configuration Management console and click on the **Cssupload** module. You can also navigate to it directly using a link:

https://{your_KMS_URL}/admin/config/tab/cssupload.
