

# Embed

Last Modified on 06/10/2021 11:09 am IDT

Field	Description
<b>enabled</b>	<p>Enable the Embed module.</p> <p>When enabled, the Share &amp; Embed tab is displayed on the Media Page.</p> <p><b>Logo Intro white</b> <span style="float: right;">♥ 0 ▶ 1 🗨 0</span></p> <p><small>From <a href="#">Demo User</a> on July 12th, 2020</small></p> <p>Details Download <b>Share</b> 🔍 <span style="float: right;">ACTIONS ▾</span></p> <p>Link to Media Page <b>Embed</b> oEmbed Email</p> <p style="background-color: #ffc107; padding: 5px; border: 1px solid #ffc107;">Grabbing the embed code will make this media public to the world and override all entitlements defined in MediaSpace. <span style="float: right;">✕</span></p> <pre>&lt;iframe id="kaltura_player" src="https://cdnapisek.kaltura.com/p/2222/sp/222200/embedframe.js/ui/conf_id/29780881/partner_id/2222?iframeembed=true&amp;playerId=kaltura_player&amp;entry_id=1_2ecnsue6&amp;flashvars{streamerType}=auto&amp;flashvars{localizationCode}=en&amp;flashvars{leadWithHTML5}=true&amp;flashvars{sideBarController.plugin}=true&amp;flashvars{sideBarController.position}=left&amp;flashvars{sideBarController.clickToClose}=true&amp;flashvars{chapters.plugin}=true&amp;flashvars{chapters.layout}=vertical&amp;flashvars{chapt</pre> <p>Start &amp; End Time: <input type="checkbox"/> Start at 00:00:00 <input type="checkbox"/> End at 00:00:00</p> <p>Player Skin: </p> <p>Player Size: <input type="checkbox"/> 608x370 <input type="checkbox"/> 400x285 <input type="checkbox"/> 304x231</p> <p>Responsive Sizing: <input type="checkbox"/></p>
<b>secureEmbed</b>	<p>Use secure embed. MediaSpace entitlements are enforced on media that is embedded in external sites. When embedding restricted or private media to your sites and blogs, you will be prompted to authenticate (if not already authenticated). If a user is authorized to watch the media according to the entitlements defined in MediaSpace, the media will play. Otherwise, a message will be displayed that they are not authorized to watch the media.</p> <p>For additional information about this feature, see the article: <a href="https://knowledge.kaltura.com/help/enhanced-settings-for-secure-embed-in-kmskaf">Enhanced Settings for Secure Embed in KMS/KAF</a> (<a href="https://knowledge.kaltura.com/help/enhanced-settings-for-secure-embed-in-kmskaf">https://knowledge.kaltura.com/help/enhanced-settings-for-secure-embed-in-kmskaf</a>).</p>
<b>autoRedirect</b>	<p>Select True to automatically-redirect the user to the SSO login page in case the user is not authenticated with MediaSpace (If the user is globally authenticated, they will be auto-authenticated by MediaSpace then redirected back to the page with the video). Select False to display a message to the user so that the user can manually select when/whether to re-authenticate.</p>
<b>autoRedirectframe</b>	<p>When autoRedirectframe is disabled (default), the redirect for authentication will</p>

Field	Description
autoRedirectMessageHTML	HTML text to display while the user is auto-redirection to the login page.
notAuthenticatedHTML	HTML text (may include links) to display inside the iFrame if autoRedirect is set to False
notAuthorizedHTML	HTML text (may include links) to display inside the iFrame in case Kaltura Entitlement authorization fails
noCategoryEmbedAccessHTML	HTML text (may include links) to display inside the Embed tab of an entry page accessed not via a category/channel/gallery, when requireCategoryContext=Yes
noCategoryPlayAccessHTML	HTML text (may include links) to display inside the iFrame, in case category-level embed grab and play are disabled for the category/gallery from where embed was originally grabbed, and/or when requireCategoryContext=Yes and a (legacy) secured embed is missing a category context.
overrideCSSURL	URL to an alternate CSS, to allow a customer to customize the iFrame design to fit corporate style guide
categoryLevelEmbed	Allow KMS category/channel (or KAF course gallery) managers to prevent grabbing and playing embed content from a specific category. Depends on CategoryEmbed/ChannelEmbed modules. For more information see <a href="https://knowledge.kaltura.com/help/enhanced-settings-for-secure-embed-in-kmskaf">here</a> ( <a href="https://knowledge.kaltura.com/help/enhanced-settings-for-secure-embed-in-kmskaf">https://knowledge.kaltura.com/help/enhanced-settings-for-secure-embed-in-kmskaf</a> ).
requireCategoryContext	Set to Yes, in conjunction with categoryLevelEmbed=Yes, to make sure embeds are only grabbed from category/gallery contexts. Grabbing an embed from a regular (context-less) entry page will not be allowed. NOTE: Setting this to Yes will cause secured embeds that lack a category context to stop authorizing playback
<b>allowEmbedframeShare</b>	Allow/Restrict sharing using 'iframe'. This configuration is only supported for non v2 supported players
<b>embedResponsiveness</b>	Enable/Disable 'Responsive Sizing' option in the embed view.

Field	Description
	<p>When enabled, the Responsive Sizing toggle button is displayed on the Share &amp; Embed tab.</p> 
<b>embedAllowed</b>	<p><b>embedAllowed</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Owner Only</li> <li><input type="checkbox"/> Co-Editor</li> <li><input type="checkbox"/> Co-Publisher</li> <li><input type="checkbox"/> anonymousRole</li> <li><input checked="" type="checkbox"/> viewerRole</li> <li><input checked="" type="checkbox"/> privateOnlyRole</li> <li><input checked="" type="checkbox"/> adminRole</li> <li><input checked="" type="checkbox"/> unmoderatedAdminRole</li> </ul> <p>Select one or more roles that can use the Embed module.</p>
<b>embedSkins</b>	<p>Define skins that can be used for embedded players.</p> <p>When enabled, the Player Skin options are displayed on the Share &amp; Embed tab.</p> 
<b>name</b>	<p>What is the name of the skin? The skin name is displayed when the user selects an embedded skin.</p>

<imgfile </imgfile  Field	What is the relative path to the image file on the server? The image file Description how the skin looks.
uiConfId	What is the numerical value of the player ID to use in the embed code?
<b>embedSizes</b>	<p>Define sizes that can be used for embedded players. Define the player size in the following format: {width}x{height}</p> <ul style="list-style-type: none"> <li>• large 608x402</li> <li>• medium 400x285</li> <li>• small 304x231</li> </ul> <div data-bbox="582 716 1428 1131"> <p>Link to Media Page <b>Embed</b> Email</p> <pre>class="kmsembed" allowfullscreen webkitallowfullscreen mozAllowFullScreen allow="autoplay"; fullscreen*; encrypted-media"" referrerPolicy="no-referrer-when-downgrade" sandbox="allow-forms allow-same-origin allow-scripts allow-top-navigation allow-pointer-lock allow-popups allow-modals allow-orientation-lock allow-popups-to-escape-sandbox allow-presentation allow-top-navigation-by-user- activation" frameborder="0" title="Kaltura Player" style="position:absolute;top:0;left:0;width:100%;height:100%"&gt;&lt;/iframe&gt;&lt;/div&gt;</pre> <p>Start &amp; End Time: <input type="checkbox"/> Start at 00:00:00 <input type="checkbox"/> End at 00:00:00</p> <p>Player Skin: </p> <div style="border: 1px solid red; padding: 5px;"> <p>Maximum Player Size: <input type="text" value="608x402"/> <input type="text" value="400x285"/> <input type="text" value="200x2"/></p> <p>Responsive Sizing: <input checked="" type="checkbox"/></p> </div> </div>
