 This article is designated for administrators.

### About

The **History module** enables users to continue watching videos from where they left off and keeps track of their viewing activity.

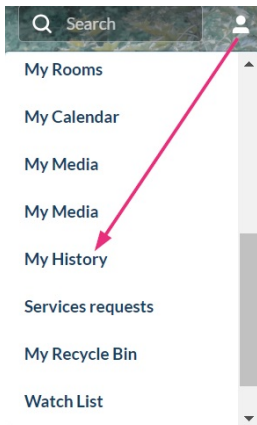

When this module is enabled, users can access a dedicated [My History page](#) in the Legacy Video Portal, where they can view and manage their watch history.

The module also powers the Resume Playback feature, which displays a progress bar on videos and allows users to resume playback from their last viewed point.

In LMS Video applications, viewing history is collected and used for features such as Resume Playback, but the My History page itself is not available, and the My History link is blocked.

Below is an example of a video portal user menu with the **My History** option.

### Configure

1. Go to your Configuration Management console, and select the **History** module. You can also navigate directly: [https://{your\\_site\\_URL}/admin/config/tab/history](https://{your_site_URL}/admin/config/tab/history).

- Headermenu
- Helppage
- History** ←
- Home
- Hotspots
- Importchannel

The 'History' page displays.

## Configuration Management

**Server Tools**

- Backup Configuration
- Player replacement tool

**Modules**

### History

**Module Info**

Title: My History

Description: The History module makes it easy to find videos you recently watched by allowing the end users to reach the "My History" page and view their watch history. You can control your watch history by deleting your history. You can delete individual items or delete your entire history.

enabled

resumePlayback  Enable the "Resume Playback" feature. This feature will enable an indicator bar below the thumbnail of videos, showing the progress of the user in it.

**resumePlaybackOptions** Collapse

videoEndPercent  Reaching this percentage of the video or higher will count as 'finished watching' the video

videoEndSeconds  Reaching this amount of seconds before the end of the video or lower will count as 'finished watching' the video

barColorBackground  The color of the progress bar background

barColorDone  The color of the finished progress bar

emptyHistory  Fill in the message the users will see when reaching an empty History page.

2. Configure the following:

**enabled** - Set to 'Yes' to enable the module.

**resumePlayback** - Set to 'Yes' to enable the resume playback feature. This feature displays an indicator bar below the video thumbnail, showing the progress. It allows both KMS and LMS Video users to resume watching from the last point viewed.

When set to 'Yes', the **resumePlaybackOptions** section opens:

resumePlaybackOptions		Collapse
videoEndPercent	<input type="text" value="90"/>	Reaching this percentage of the video or higher will count as 'finished watching' the video
videoEndSeconds	<input type="text" value="10"/>	Reaching this amount of seconds before the end of the video or lower will count as 'finished watching' the video
barColorBackground	<input type="text" value="#00b4d1"/>	The color of the progress bar background
barColorDone	<input type="text" value="#bbbbbb"/>	The color of the finished progress bar

- **videoEndPercent** - Enter the percentage of the remaining playback to consider the video 'completely watched'. Reaching this percentage or higher will count as 'finished watching'.
- **videoEndSeconds** - Enter the amount in seconds before the end of the video that will be considered as 'a completely watched video'. Reaching this amount of seconds or lower will count as 'finished watching'.
- **barColorBackground** - Enter the hex code for the background color of the progress bar.
- **barColorDone** - Enter the hex code for the background color of the finished progress bar.

**emptyHistory** - You can customize the message users see when reaching an empty History page by changing the text here. The default message is: 'Your feed is empty. But it doesn't have to be! Go to the Homepage or browse our Channels to fill your feed with amazing videos each and every day.'

emptyHistory	<input type="text" value="&lt;h2 class='empty-header'&gt;Your fe"/>	Fill in the message the users will see when reaching an empty History page.
deleteAllText	<input type="text" value="This will clear all your watch histor"/>	Fill in the message the users will see when clicking on the clear all history button.
showUnlisted	<input type="text" value="No"/>	Show/hide 'unlisted' entries from the users history.
supportSecureEmbed	<input type="text" value="No"/>	Allow videos in a secure embed to be added to the user's history.
addToHistoryTrigger	<input type="text" value="play"/>	Choose the way videos are added to the user's history. Play - videos will be added with a play click. View - videos will be added by landing on the video page. (Entries of type image will always be triggered by view event)

**deleteAllText** - You can customize the message users see when clicking the 'Clear all History' button by changing the text here. The default message is: 'This will clear all your watch history, from other applications as well. Are you sure you want to clear your entire watch history? You can't undo this.'

**showUnlisted** - Set to 'Yes' to show unlisted entries in the history.

**supportSecureEmbed** - Set to 'Yes' to allow videos that are securely embedded to be added to history.

**addToHistoryTrigger** - Choose the way videos are added to the user's history: 'Play' or 'View'.

- 'Play' = videos will be added with a play trigger (click on the Play button is needed if autoplay is not turned on).
- 'View' = videos will be added by landing on the video page. (Entries of type image will always be triggered by view event.)

3. Click **Save**.
