

Hotspots

Last Modified on 05/18/2020 10:53 pm IDT

Hotspots are an extra layer of info on top of the player with the option to link them to an external URL or specific time in the video.

Minimum supported player version: 2.75 [Click here](#) to navigate to the KMC Universal studio. Please make sure to update the [Entrydesign](#) module players to version: 2.75 in the KMC Studio.

If there are players used in the KMS/KAF instance that do not meet the minimum player requirement, an alert is displayed listing those players with their UIconf IDs.

The ability to Save the Hotspots module's configuration is available only after upgrading legacy players.

Field	Description
enabled	Enable the Hotspots Module.
