

PlaylistPage

The Playlist configuration page dedicated to generating a player ID is accessed from the Configuration Management page Global sub-category PlaylistPage. You can generate a player ID or refer to the playlist player ID in this module if you need to use the player ID number.

Field	Description
playerId	<p>Enter the Playlist playerId. The playerId field is initially empty and the following message is displayed: "Create a Playlist player ID (uiConf ID) for playlists dedicated view page".</p> <p>Click Create to generate the player ID.</p>
