About

By default, media that is uploaded is private. In order for other legacy Video Portal users to be able to publish it, you need to enable the **Publish module**.

Configure

1. Go to your Configuration Management console, and navigate to the **Publish** module. You can also navigate directly using a link:

https://{your_KMS_URL}/admin/config/tab/publish.

Personal profile
Presenters

Replacemedia
Robots

2. In the **Publish** window, set **enabled** to 'Yes'.

Publish

enabled	<input type="button" value="Yes"/>	Enable the Publish module.
defaultPublishStatusOnUpload	<input type="button" value="private"/>	Choose the publishing status of newly uploaded media to the site. You can select "Private", "Unlisted", or "Published" to a default channel of your choice.
manPublish	<input type="button" value="Yes"/>	Enable publish to a list of categories - from the menu, media, and upload. Disable this if you do not have access to the list of categories.
AppearsInIndicator	<input type="button" value="Show"/>	the "Appears In" indication on the media page and in the global search.
crossApplicationUnpublishing	<input type="button" value="No"/>	By enabling the Cross Application Unpublishing, users will be able to set content as private in one application and to have it private across all other applications.

3. Set the entry privacy status (default is Private).

defaultPublishStatusOnUpload - Define the default privacy for each newly uploaded media as follows:

defaultPublishStatusOnUpload	<input type="button" value="private"/>	Choose the publishing status of newly uploaded media to the site. You can select "Private", "Unlisted", or "Published" to a default channel of your choice.
------------------------------	--	---

- **Private** - Media will be visible to the content owner only.
- **Unlisted** - This allows the media owner to control the privacy mode. An unlisted entry can be viewed by anyone with the link to the entry page.

Note that this configuration is applicable only if Unlisted mode is enabled on your MediaSpace instance. You can check if it is enabled under Application > **enableUnlisted**.

- **published** - When you choose published, the **PublishedChannel** option displays:

PublishedChannel

Select Channel

Select a channel new media will be automatically published to upon upload.
 Note: if a private channel is selected, media owners who are not entitled to the private channel will not be able to remove the content from that channel, and the entry will appear as 'private' to them.

- **PublishedChannel** - Allows you to set all uploaded media to automatically be published to a pre-selected channel. (**Auto Publish**)

Publish

enabled

Enable the Publish module.

defaultPublishStatusOnUpload

Choose the publishing status of newly uploaded media to the site. You can select "Private", "Unlisted", or "Published" to a default channel of your choice.

PublishedChannel

Select Channel

Select a channel new media will be automatically published to upon upload.
 Note: if a private channel is selected, media owners who are not entitled to the private channel will not be able to remove the content from that channel, and the entry will appear as 'private' to them.

manPublish

Enable publish to a list of categories - from the menu, media, and upload. Disable this if you do not have access to the list of categories.

- Click **Select Channel**.
- Enter the channel name or ID in the box that opens.
- Click **Submit** or **Cancel**.

4. Set more parameters:

manPublish - This allows entries to be published to a list of categories from the menu, media, and upload. Disable this if you don't have access to the list of categories.

AppearsInIndicator - Setting it to Show enables the 'Appears In' indication on the media page and in the global search.

crossApplicationUnpublishing - This allows users to set content as private in one application and has it private across all other applications.

5. Click **Save**.
