Staticpages module

Last Modified on 09/11/2025 5:20 pm IDT

You can add static/content pages to your MediaSpace site. Static pages can be used, for example, to create help pages, privacy policies, etc. From the KMS Admin, enable the *Staticpages* module. After you enable the module, you can add multiple pages to your site. Each page should include a customized HTML code and can be identified by the slug field (the extension added to the MediaSpace link that refers to the page).

Find the fields and description below:

Field	Description
Module Info	
description	Create custom static pages in KMS.
styling	It is best to use Bootstrap css classes in the markup.
custom styling	Use inline styles, or consider using the cssupload module.
enabled	Enable the Staticpages module.
title	The title of your page to display as the page header
pageSlug	What is the ***unique*** semantic slug for your page? (e.g.www.yourvideoportal/<slug>) The unique identifier for the page to be accessed as a URL. For example, if you provide 'privacy' as a slug, you can add links to your static page as [MediaSpace URL]/privacy. You can add these links in Navigation or Headermenu modules or anywhere you want to include links to your pages within the MediaSpace site.
permission	Select the minimum role allowed that can access this page. Set as anonymousRole to keep this page public. Use the “guest override” field to allow anonymous users to access static pages even if anonymous is turned off in KMS.
content	What is the content of this page? You can use HTML and Bootstrap.
