

Styling module

Last Modified on 09/15/2025 11:41 am IDT

 This article is designated for administrators.

About

The **Styling module** lets you create new styles based on common use cases. With this module, admins can preview the generated style, share it with other admins for review, and then apply it in production.

This guide covers the non-Theming styling options. For information about Kaltura's Theming feature set, see [Video Portal Theming tour](#).

For advanced theme creation, for which a deep CSS understanding is required, please use Kaltura's [Cssupload module](#).

Custom CSS fonts

Enable - Select Yes to enable the Styling module

Fonts - Select **+Add "fonts"** These fonts will be available in custom CSS and in the Font selectbox on the styling page

- **familyName** - Font family name that will be used in CSS and will be appended to the Font select box on the styling page.
- **fallbackFonts** - Font families and font types which should be used as a fallback when the desired font family is not ready or doesn't exist (comma-separated list, like in CSS specifications).

Specifying generic font type (like `serif` or `monospace`) is mandatory.

Example: `'Helvetica Neue',Arial,sans-serif`

type - Font assets source type:

- **System font** - use worldwide supported font by name
- **Import from URL** - use an external font service (like Google Fonts)

- **Upload files** - upload your own font asset files

isCssApplied - This field indicates whether the style created in the Styling Module is applied on the site or not. Click Reset to clear all previously set styles.

Configuration

The **Styling** configuration page provides administrators with an interface where they can modify look and feel attributes like text color, background color, and fonts.

Use the link provided in the description to access the new Styling page.

Styling

Module Info

name	Styling
description	<p>Click here to go to the Styling Page.</p> <p>Use this module to create a new style for your site. Use the link provided in the Description field to access the new Styling Page. You can preview and share the new settings with other admins before applying the changes to the site.</p>

The **Styling Configuration** page displays.
