

Categoryembed

This module enhances the [Secure Embed](#) feature in the [Embed](#) module, and is a prerequisite for turning this module on. Once enabled, you can control if the content's embeds can be taken from within the category.

NOTE: This is a KMS feature only, and will not work on KAF instances.

Use this module to allow category managers to block embed-grabbing from their category (useful when managing copyrighted content whose consumption should be confined to the portal). For more information read [here](#).

You can also the limit embed-grabbing to published content only.

Field	Description
enabled	Enable the Categoryembed Module.
enableEmbedOnByDefault	What should be the default "Enable Embed" in the Channel settings page, affecting whether users can grab an embed of an entry in the context of a channel?
embedRoles	Select one or more roles that can grab an embed if enabled.
allowManagerOverride	Can a channel manager override the default behavior of Enable Embed?
