

Categorymoderation module

Last Modified on 11/19/2024 11:29 am IST

 This article is designated for administrators.

About

Use the **Categorymoderation** module to enable moderation for a gallery. This allows gallery managers and moderators to approve or reject content before it is displayed.

 The Categorymoderation module pertains to the video portal only. For KAF applications, please refer to the [Channelmoderation module](#).

Configure

1. Go to your Configuration Management console, and click the **Categorymoderation** module. Or navigate directly using a link:
https://{your_KMS_URL}/admin/config/tab/categorymoderation.

Modules / category

Categoryembed

Categorymembers

Categorymoderation

Categorytheme

The Categorymoderation page displays.

Categorymoderation

enabled	<input type="checkbox"/> Yes	Enable the Categorymoderation module.
forceModeration	<input type="checkbox"/> None	Choose to hide the ability to change the moderation from category owners while setting a default for any new category created from the application. Once set, settings cannot be changed from KMS.
moderationDefaultValue	<input type="checkbox"/> No	Choose a default moderation value for newly created categories. This value can be changed later on by the category owner from the edit category page.
requestConfirmationPopup	<input type="checkbox"/> No	Choose Yes to present a pop to the moderator asking to confirm the rejection/approval.

2. Configure the following:

enabled - Choose 'Yes' to enable the module.

forceModeration - Choose whether to hide the ability to change the moderation from category owners while setting a default for any new category created from the

application. Once enabled, these settings cannot be modified from within the video portal. Select one of the following from the drop-down list:

- None
- Moderated
- Not Moderated

If you choose **None** or **Not Moderated**, additional fields display:

moderationDefaultValue - Set a default moderation status for newly created categories. Category owners can adjust this setting later from the edit category page.

requestConfirmationPopup - Choose 'Yes' to present a pop-up message to the moderator asking to confirm the rejection / approval.

3. Click **Save**.

User experience

The following image demonstrates how a category manager can enable moderation for a category:

Options

- Options:
- Moderate content (Media will not appear in category until approved by category manager)
 - Enable comments in category
 - Keep comments private to category.
-

Save
