This article is designated for administrators.

About

The **channelEmbed module** allows you to control how the share and embed feature behaves within specific channels, providing more granular permissions and flexibility compared to the main Embed module.

With channelEmbed, you can customize embed settings to allow or restrict access based on the channel's context. For example, you can prevent users from grabbing the embed code in private channels while still enabling it for public channels, or limit embed access to published content only.

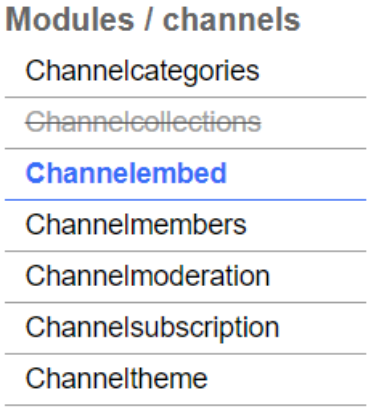

This module is ideal for managing copyrighted or sensitive content that should only be shared under certain conditions.

Check our Embed a channel playlist user guide.

This module is only for legacy Video Portal.

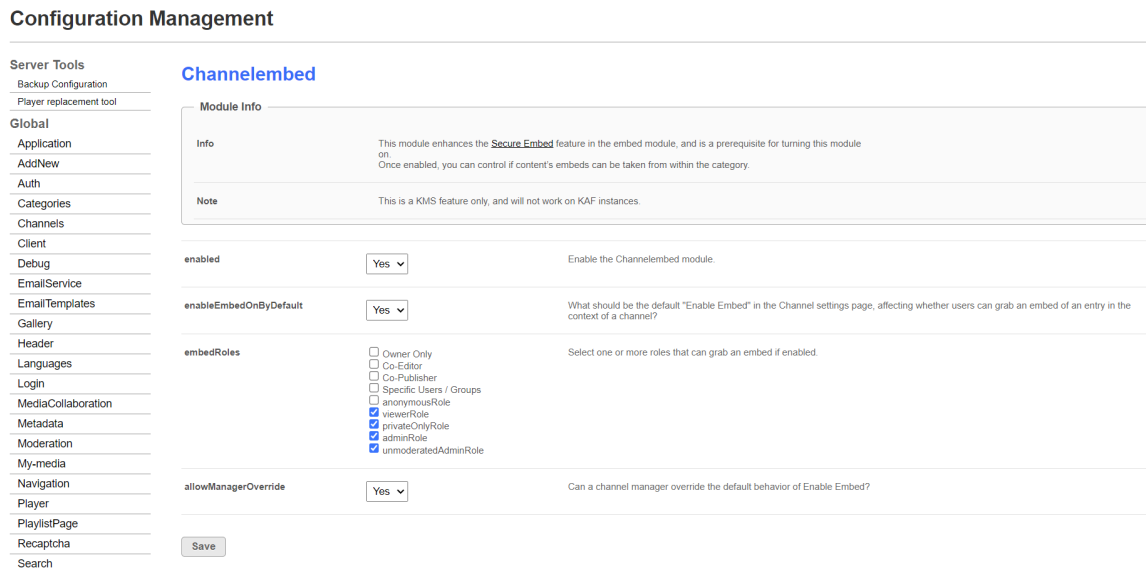

Configure

1. Go to your Configuration Management console, and click the **Channelembed** module. Or navigate directly using a link: https://{your_KMS_URL}/admin/config/tab/channelembed.

   The Channelembed page displays.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

2. Configure the following:

   enabled - Set to 'Yes' to enable the module.

   enableEmbedOnByDefault - Set to 'Yes'.

   embedRoles - Select one or more roles that can grab an embed code if enabled. Choose from the following options:

- owner only
- co-editor
- co-publisher
- specific users / groups
- anonymous role
- viewer role
- private only role
- admin role
- unmoderated admin role

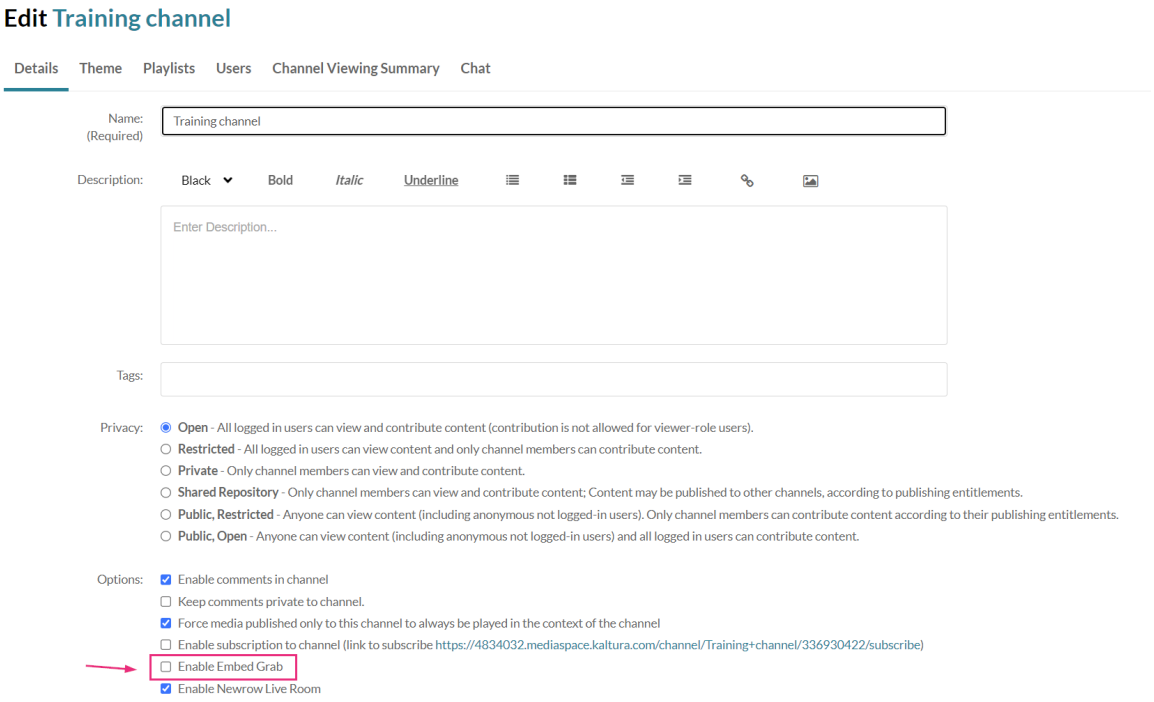

allowManagerOverride - Set to 'Yes' to allow a channel manager to override the default behavior of 'enable embed'.

- Click Save.

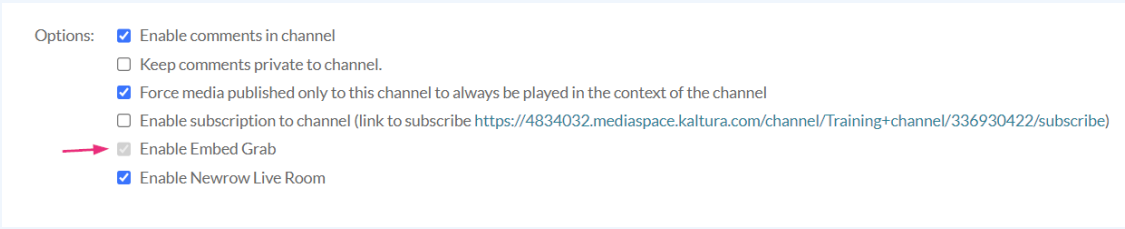

User experience

When enabled, a checkbox appears on the channel details page, allowing the channel manager to toggle the setting as needed.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

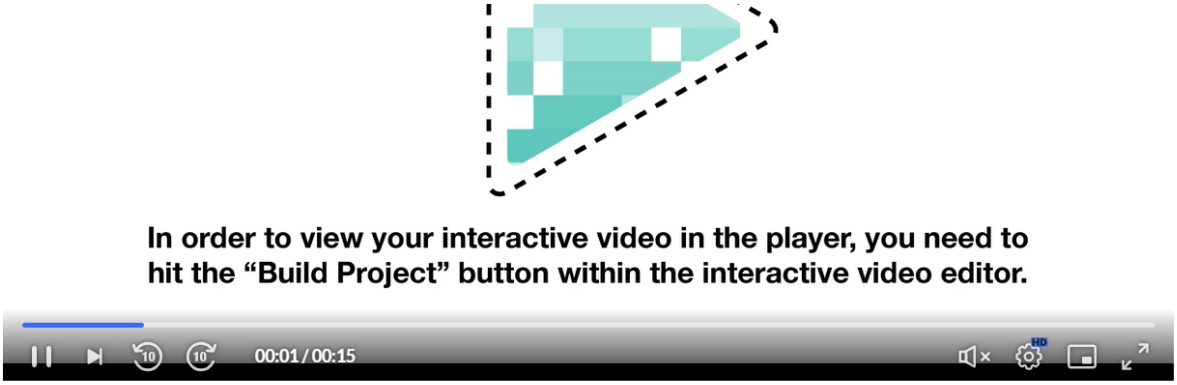

When the **allowManagerOverride** field is set to 'No', the **Enable Embed Grab** checkbox is displayed but will be disabled.

When an end-user attempts to grab an embed of an entry from a channel that prevents embed grabbing, the following message is displayed: *Grabbing of this content is possible only from locations which allow it. Please see the *Appears In* field under the Details tab for potential locations which may allow publishing. If no allowing location is found, please contact your administrator, or reach out to the content owner directly.*
