

Channelembed

This module allows you to decide on the default behavior of the embed when an entry is accessed in the context of a channel.

This module enhances the [Secure Embed](#) feature in the [Embed](#) module, and is a prerequisite for turning this module on.

Use this module to allow channel managers to block embed-grabbing from their channel (useful when managing copyrighted content whose consumption should be confined to the portal). For more information read [here](#).

You can also the limit embed-grabbing to published content only.

Field	Description
enabled	Enable the Channelembed Module.
enableEmbedOnByDefault	What should be the default "Enable Embed" in the Channel settings page, affecting whether users can grab an embed of an entry in the context of a channel?
embedRoles	Select one or more roles that can grab an embed if enabled.
allowManagerOverride	Can a channel manager override the default behavior of Enable Embed?
