About

You can enable the **channelsubscription** module so users can subscribe to channels and get email notifications for new content and updates. Make sure to also enable the emailnotifications module and check the "Entry was added to channel" option in **Manage Notifications**.

Check out our Channel subscription user guide.

> 💡 Channel managers need to enable subscriptions on the channel details page. For more information, see our article Create a new channel.

Configure

1. Go to your Configuration Management console, and navigate to the **Channelsubscription** module. Your link should look like this: https://{your_KMS_URL}/admin/config/tab/channelsubscription.

The Channelsubscription module displays.

Channelsubscription

Module Info

Description	The Channelsubscription module allows you to enable subscriptions to channels. Users can subscribe to individual channels and get an email notification each time media is published to the subscribed channel. Read more in the channel subscriptions article.
Note	KMS only Module.

enabled	Yes ▾	Enable the Channelsubscription module.
channelSubscriptionProfileId	19233452	Custom metadata profile id for storing whether channel subscription is enabled for channel
subscriptionDefault	No ▾	Once turned on, any new channel will have the subscription turned on by default. Channel owners can still turn the feature off and on from the individual channel configuration page.

Save

2. Configure the following:
   - **enabled** - Set to 'Yes' to enable the module.
   - **subscriptionDefault** - Once set to 'Yes', any new channel will have the subscription turned on by default.

> 💡 Channel owners can still turn the subscription feature on and off from the individual channel configuration page. See Create a channel to learn more.
