

# Configuring SSO Gateway Authentication and Authorization

Last Modified on 08/05/2020 11:27 am IDT

To learn more about integrating MediaSpace with your authentication systems using the MediaSpace SSO Gateway, [Kaltura MediaSpace Authentication and Authorization Solutions – Overview](#) and [Kaltura MediaSpace SSO Integration Guide](#).

## To configure user authentication using the MediaSpace SSO gateway

1. On the Configuration Management panel of the Kaltura MediaSpace Administration Area, open the [Auth](#) tab.

After you complete and verify the following steps, click **Save**.

2. Under [authNAdapter](#), select **SSO Gateway AuthN**.

authNAdapter

SSO Gateway AuthN

Header AuthN

Kms\_Auth\_AuthN\_Kaltura

LDAP AuthN

SSO Gateway AuthN

Add custom value

3. Select your preferences for the [common login options](#).

4. Under [refreshDetailsOnLogin](#), select your preference.

This option affects the updating of the user's first name, last name and email address (when provided) from your authentication system upon every login.

refreshDetailsOnLogin

Yes

No

Yes

Should user details on Kaltura be updated through an external authentication provider?

5. Under [sso](#), select your preferences for integrating the MediaSpace SSO Gateway with your login implementation:

- **loginUrl** – Enter the absolute URL where you host the login page.
- **logoutUrl** – Enter the URL to which MediaSpace redirects a user after invalidating the local MediaSpace session (for example, when a user clicks **logout**).
  - On your site you may use this page to invalidate other authenticated sessions, if needed (for example, CAS login).
  - A *sessionKey* URL parameter is automatically appended to the logout URL. This parameter securely encapsulates the user information, enabling you to know which user logged out. The *sessionKey* parameter is constructed using the [secret](#) shared with the login page.

**SSO**

Configure the built-in Single Sign On Gateway authentication class (SSOAuth).

<b>secret</b>	<input type="text" value="default"/>	Enter a custom secret, or enter 'default' to use the Kaltura Admin Secret associated with your Kaltura account.
<b>loginUrl</b>	<input type="text"/>	What is the URL for the SSO gateway login page? Note: The 'ref' parameter is added automatically.
<b>logoutUrl</b>	<input type="text"/>	What is the URL to which a user is redirected after logging out of MediaSpace? Usually, you enter your organization's login page.

- If you are using the MediaSpace SSO Gateway to authorize user access to MediaSpace with a specific application role, continue with the next procedure.

### To configure user authorization using the MediaSpace SSO gateway

1. On the Configuration Management panel of the Kaltura MediaSpace Administration Area, open the [Auth](#) tab.  
After you complete and verify the following steps, click **Save**.
2. Under [authZAdapter](#), select **SSO Gateway AuthZ**.

**authZAdapter**

SSO Gateway AuthZ ▾  
 Kms\_Auth\_AuthZ\_Kaltura  
 LDAP AuthZ  
 SSO Gateway AuthZ

3. Under [refreshRoleOnLogin](#), select your preference.  
This option affects the updating of the user's role upon every login.

**refreshRoleOnLogin**

Yes ▾  
 No  
 Yes

Should the user role on Kaltura be updated through an external authorization provider?  
 Select 'No' to allow overriding a role through Kaltura user management.
