

Why does the gradebook column show zeroes after students submitted a Canvas Quiz assignment? (Canvas LMS only)

Last Modified on 06/14/2020 11:44 am IDT

Did you follow all the steps in the [Interactive Video Quiz Canvas Gradebook Integration Deployment Guide](#) to deploy the graded quiz?

If so, did you set a Points value for the Canvas Assignment when you set it up?

The screenshot shows the Canvas assignment configuration interface. At the top, the title is "Introduction quiz - points assigned". Below the title is a rich text editor toolbar with various icons for text formatting and insertion. The main content area is empty. Below the editor, there are several configuration fields:

- Points:** A text input field containing the number "10". A red arrow points to this field.
- Assignment Group:** A dropdown menu with "Assignments" selected.
- Display Grade as:** A dropdown menu with "Points" selected.
- Do not count this assignment towards the final grade
- Submission Type:** A dropdown menu with "External Tool" selected.
- External Tool Options:** A section with the heading "Enter or find an External Tool URL". It contains a text input field with the URL "https://1913351-10.kaf.kaltura.com/br" and a "Find" button.

If you did not set the Points value in the Canvas Assignment screen, the value in the Canvas gradebook after submitting a quiz assignment will be 0. You will still see students' responses and scores in Kaltura analytics for that quiz.

To learn how to access the Kaltura analytics page for a Quiz, see the [Quiz Reporting](#)” section in the Interactive Video Quizzes Guide for Creating Quizzes.
