What happens if I change the KAF alias? (legacy)

Content updated: 06/14/2020

This article is designated for administrators.

Old embedded content will continue to function properly as long as the original app in Canvas remains installed. If a new alias is added to an instance and all embeds need to function correctly under that new alias, *Instructure* must update the URLs in the database. Please contact your Kaltura representative for more information.
