

# What happens if I change the KAF alias?

Last Modified on 06/14/2020 11:45 am IDT

Old embedded content will continue to function properly if the original app in Canvas remains installed. If a user adds a new alias to an instance and requires all embeds to function properly on that new alias, Instructure must be engaged to change the URLs in the database. Please see your Kaltura representative for additional information.
