

Does Kaltura allow the branding of the Kaltura Player?

Last Modified on 06/17/2020 2:29 pm IDT

Players can be branded or skinned by changing the Player logo and colors, or even by creating completely new css themes. To change the logo on your Player see: [Universal Studio Information Guide](#).

To learn more about creating a custom theme, please refer to the [Kaltura Player v2 Toolkit Theme & Skin Guide](#).
