

Access Kaltura Media in Wonda Labs

Last Modified on 04/16/2026 8:51 pm IDT

This article describes how to access Kaltura media in Wonda Labs.

In your Wonda Labs Media Library, when adding new media, "From Kaltura" displays as an available choice. Click on the desired media to insert it into your project.

If you would like to use 360° media from Kaltura in Wonda Labs, you must tag that media as "360" directly in Kaltura so that it is recognized as spherical media. Please see [Kaltura 360° and VR Video Player Support](#) for more information.
