Embed Content in a Document Within the Course Content
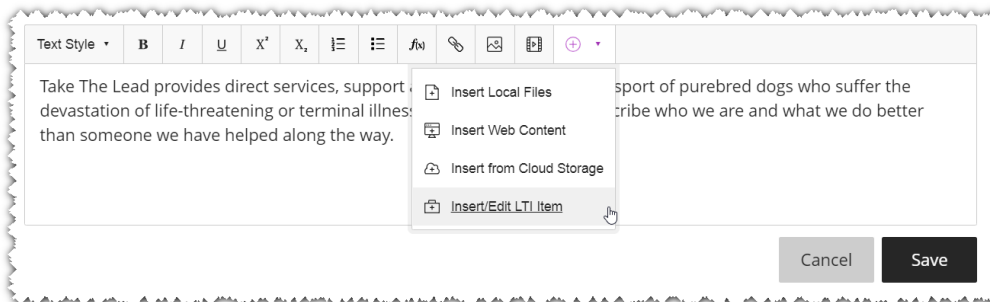

Last Modified on 06/23/2020 4:14 pm IDT

You can embed content in two ways - into a document in the course content (see below) or directly in the course content.
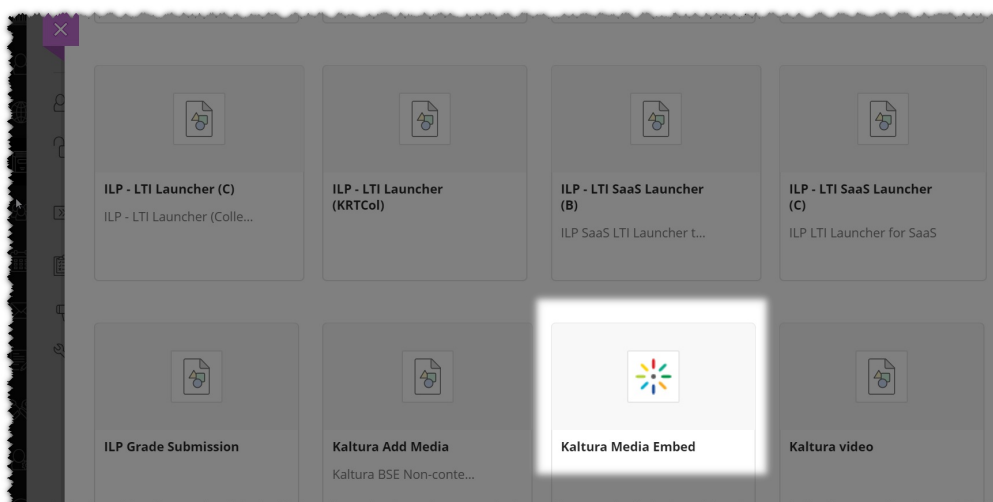

1. Navigate to the desired course.
2. Open the "Course Content" section and navigate to the document.

3. Click the "+" sign in the editor and choose the "Insert/Edit LTI Item".

4. Locate the Browse Search and Embed (BSE) tool within the Content Market. (Note: The embed tool may have a different name than the one indicated in the image).

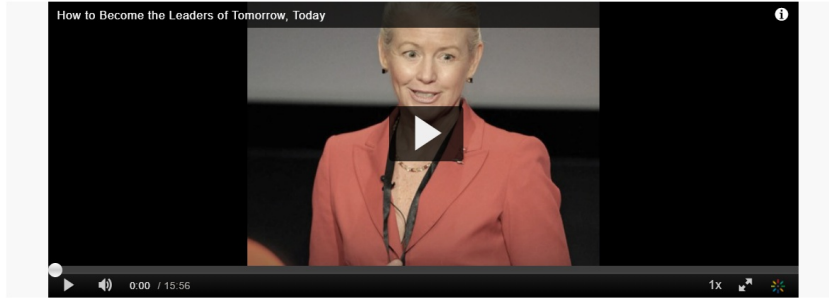

5. Click to launch the tool and select your media. The embedded content will be displayed on the document:

Leadership skills

A Document example with Kaltura Media

Visible to

Take The Lead provides direct services, support and care for people in the sport of purebred dogs who suffer the devastation of life-threatening or terminal illness. Perhaps no one can describe who we are and what we do better than someone we have helped along the way.

How to Become the Leaders of Tomorrow, Today
