

Overview of the Kaltura Video Extension for Oracle Eloqua

Last Modified on 04/14/2021 10:38 am IDT

The Kaltura Video Extension for Oracle Eloqua is built to allow modern marketers to enhance their marketing campaigns with video as a strong marketing tool.

The extension empowers the marketers with the following abilities:

- Easily add videos to Eloqua landing pages
- Track user video interaction and use it for lead nurturing, scoring, qualification and reports
- Collect leads and additional data in the video player
- Have call to action buttons in the video player to increase user engagement

For more information on Kaltura marketing integrations, please see [Kaltura Video Marketing Toolset](https://corp.kaltura.com/video-content-management-system/video-marketing-toolset/) (<https://corp.kaltura.com/video-content-management-system/video-marketing-toolset/>).
