

Order translations

Last Modified on 06/28/2025 12:17 pm IDT

 This article is designated for all users.

About

Translations convert the spoken language in a video into another language and appear as subtitles. These subtitles provide viewers with the dialogue in their preferred language while keeping the original audio intact.

Translation options

You have three ways to get translations with REACH:

Option 1: Automatic translation - REACH will automatically create subtitles in another language based on your video's audio. Good for when you want a quick, simple translation and don't need perfect word-for-word accuracy.

Option 2: Upload your own captions file and have it translated - If you already have a captions file, you can upload it and REACH will translate it into another language. Your file must be at least 99% accurate for the translation to be reliable. Accepted file types: SRT, DFXP, or XML.

Option 3: Order professional captions first, then translate - If you want the best accuracy, use REACH to create professional, human-made captions, then translate that file into another language.

These instructions are for non-Theming users. If you have [Theming](#) enabled on your account, please see our article [Order translations - Theming](#).

Option 1: Automatic translation

1. Navigate to the [media page](#) of the desired video, and select **Caption & Enrich** from the **Actions** menu.

When the captions are ready, they are automatically added to the video.

You can set up an automatic email notification to be alerted when the professional captions are ready. This is configured by your administrator in the [Reach module's notifiedUsers](#) field.

Option 2: Use your own captions file to create translations

If you already have a captions file (SRT, DFXP, or XML) in the video's spoken language, you can use it to create translations. The file must be at least **99%** accurate for the translation to be reliable. If needed, you can manually edit your captions to reach this accuracy before ordering the translation. For help editing captions, see [Edit captions](#).

1. Navigate to the [media page](#) of the desired video, and select **Caption & Enrich** from the **Actions** menu.

Save

5. Browse to the file on your computer (the file must be SRT, DFXP, or XML) and upload it.

The system can't verify the accuracy rate of the selected file, and therefore assumes it's 99+%. If it's lower, the captions will upload but won't appear on the player.

6. If you'd like to give the file a label for the source language, type it in the **Label** field (this name displays in the player captions menu).
